

Genelec is the global leader in the design and manufacturing of loudspeakers for both professional and home applications. Founded in Finland in 1978, our customers include the world's finest recording studios, broadcasters and public spaces, complemented by a rapidly growing community of customers creating and enjoying music at home. We are a company driven by purpose, innovation and passion, with high ethical standards and a total commitment to quality and sustainability.

We are now looking to strengthen our R&D team with the addition of a Software Design Engineer and Junior Software Design Engineer, who will be part of our highly focused software team. This is a unique opportunity to bring your skill and creativity to one of the world's most highly respected audio company.

#### **Software Design Engineer**

We offer software engineering positions in the area of Graphical User Interface (GUI) software design and implementation on Macintosh and Windows OS platforms in environments running IP protocols. You have a university degree in software engineering, and experience in OOD design using C++. You are familiar with GUI design and with using IP networking protocols. You want to work in a team developing leading-edge product concepts and solutions in the area of professional audio. The location of work is at the Genelec factory in Iisalmi, Finland.

For more details please contact to R&D Director Aki Mäkitvirta using email [aki.makivirta@genelec.com](mailto:aki.makivirta@genelec.com) or tel +358505535915. Please email to us your Application and CV with salary request by November 3<sup>rd</sup>, 2023, to [paula.ruotsalainen@genelec.com](mailto:paula.ruotsalainen@genelec.com). Please use "Software Design Engineer" as your email subject.

#### **Junior Software Design Engineer**

We are looking for software engineers starting their careers, finalizing their education or in the thesis/project phase. We offer challenging work in the area of Graphical User Interface (GUI) design on Macintosh and Windows OS platforms. Your university degree is in software engineering. You are interested in creating new product concepts using modern GUI programming tools and you also want to work with IP networking applications. You want to work in a team developing leading-edge product concepts and solutions in the area of professional audio. The location of work is at the Genelec factory in Iisalmi, Finland.
