

HYGENIQ®
CLEAN AIR

Carefree contact

Faster, cleaner, greener, safer, better

Easy cleaning

The HYGENIQ CLEAN AIR Fogger is a practical machine for achieving optimal hygiene on a large scale. With the HYGENIQ CLEAN AIR Fogger, you can effectively clean large spaces and surfaces very quickly. The ergonomic backpack unit creates and disperses a mist that can clean the air. Bonus: this makes it super easy to apply in places or onto surfaces that are difficult to reach. Use the HYGENIQ CLEAN AIR Fogger to create a clean bubble for employees, visitors and guests!

New way of cleaning

Specially developed for the next generation. The mist disperses a natural cloud that cleans the surfaces and the air. The unique formula contains only natural ingredients and no added color, fragrance or preservatives. Harms nothing but dirt.

High-volume tank

The three-litre tank is easy to fill, clean and empty into a drain. High efficiency of up to 12,000 m³ with one tank. Easy to refill thanks to the removable tank.

Interchangeable rechargeable battery

We have stopped using power cords. Freedom of movement makes working with the HYGENIQ CLEAN AIR Fogger easy and efficient. The smart plug & play approach results in continuous functioning because the empty battery can be easily replaced with a charged one. The battery life is 1 hour and it can be recharged in just 1 hour and 50 minutes. The battery weighs only 1.2 kg.

Get the job done quickly

A powerful motor speeds up mist production. This means that larger volume of spaces can be treated quickly. For example, in cinemas, gyms, offices, conference rooms, airplanes, trains, buses, cruise ships and shopping malls. Also suitable for screens, keyboards, switches, etc. The interchangeable nozzles ensure the mist ranges from a dry mist with low humidity \approx 20 microns to more humid mists up to 150 microns. Use the HYGENIQ CLEAN AIR Fogger to treat up to 7,500 m³ an hour for just 1 eurocent per m³!

Harms nothing but dirt

By using the Fogger to treat entire areas quickly and easily, it is possible to effectively clean hard-to-reach places. The range of nozzles ensures that you can choose the best nozzle for the job.

We color our world and our color is green

HYGENIQ CLEAN AIR Mist is a truly green hygiene solution. The product is 100% natural and has been proven to be completely safe for the environment. Moreover, less waste is produced thanks to the HYGENIQ CLEAN AIR Fogger's rechargeable batteries.

Cleaning and comfort go hand in hand

The HYGENIQ CLEAN AIR Fogger and mist are very easy to use! The HYGENIQ CLEAN AIR Fogger was designed as a comfortable, ergonomic backpack to allow complete freedom of movement and ease to use. The machine has an ergonomic mist hose or fast, reliable and simple operation. The main operating controls are located at the top of the machine. Everything you need is at your fingertips. While fogging an area, you always have one hand free to wipe down surfaces. The backpack weighs just 7.9 kg.

With your eyes closed...(or one hand behind your back)

Optimal hygiene has never been so easy. The HYGENIQ CLEAN AIR Fogger quickly results in clean and healthy spaces for guests, staff and visitors. The machine is easy to use thanks to the ergonomic backpack and simple operating controls.

Technical parameters

Item	Specifications
Voltage	DC 24 V
Rated power	450 W
Battery life when fully charged	1 hour
Theoretical capacity	7,500 m ³ /h
Tank capacity	3.5 L
Theoretical capacity p/tank	12,000 m ³
Mist spraying distance	6 m
Machine weight	7.9 kg
Weight of machine + battery	9.1 kg
Dimensions (L x W x H)	200 x 230 x 600 mm
Battery charging time	1 hour and 50 minutes
