

Sky Discovery Announces Partnership with eDiscovery AI to Deliver AI-powered Solutions

Sky Discovery Press Release:

28 February 2025

Sky Discovery, a leading provider of eDiscovery and legal technology solutions, is pleased to announce a partnership with eDiscovery AI, a pioneer in AI-powered legal technology. This collaboration aims to advance the delivery of innovative AI solutions designed to streamline and optimise the document review process for legal teams.

As part of this partnership, Sky Discovery is utilising eDiscovery AI on multiple current, active matters to review large sets of documents using prompts. Sky Discovery is the first company in the world to combine the services of eDiscovery AI with Continuous Active Learning (CAL) on a live matter currently at trial. CAL is a court-approved machine learning technology built into the Relativity platform. This innovative approach is expected to dramatically reduce costs, enhance accuracy, and speed up the first level of document review.

"We are thrilled to partner with eDiscovery AI on delivering these truly cutting-edge technologies to our clients" said Dan Heinrichs, Associate Director of Consulting at Sky Discovery. "Sky Discovery has been ideally placed to move ahead as an early adopter of this exciting new technology while relying on our deep experience in both eDisclosure and integration of advanced technology into standard eDisclosure workflows. While the technology is revolutionary in this space, the tailored, expert advice eDiscovery AI and Sky Discovery can provide in this area has been equally crucial to successfully delivering AI-powered document review to our clients. We believe new problems require new solutions. AI is not an entirely new capability for us; however, this partnership signifies the ongoing evolution of our market-leading innovation culture."

The partnership highlights enhanced workflows that streamline critical aspects of document review, including relevance determination, privilege identification, PII detection and extraction, and more. The platform's support for foreign language and multimedia content further broadens its application across industries, ensuring consistent and defensible document reviews.

"Partnering with Sky Discovery allows us to maximise the potential of our AI solutions, particularly in the area of generative AI-powered document review," said Jim Sullivan, CEO and Founder of eDiscovery AI. "With Sky Discovery's unmatched discovery expertise, we're able to deliver more impactful, scalable, and precise solutions for legal professionals across the globe. Together, we are raising the bar on what's possible in document review."

About Sky Discovery

Our global team of lawyers, eDiscovery experts, technicians, and innovators make our market-leading work possible. We offer around-the-clock specialist support alongside advanced custom tools and workflows to give lawyers and their teams an accurate, practical, and defensible advantage. In partnership with our clients, Sky Discovery supports disputes, regulatory responses, and investigations in Australia and the UK. We truly understand discovery and disclosure challenges and know how to make a positive difference. AI or otherwise, we always find practical solutions to make lawyers' lives easier.
