

ELECTRICITY METERS

- Generation Meters
- Smart Meters
- Pre-payment Meters
- Coin Meters
- RFID Meters

UK
CA CE

INTRODUCTION

Electricity meters allow you to see how much energy is being consumed within an installation, sub metering allows monitoring of individual applications and or other areas, such as electric vehicle charging and solar energy, this can then lead to energy saving as it's important to know how much electricity you are using and distributing.

This brochure highlights a selection of electricity meters which covers commercial, domestic and industrial applications to help you monitor and control electricity usage.

From 'standard kWh meters' to 'smart meters' we can offer a solution for your application, including prepayment meters and dual tariff meters, even a landlord monitoring software tools for remote analysis and billing if required.

Included within the brochure is meter selection chart, handy as a guide to choosing the correct meter for your application, if you can't see what you are looking for or you require further information, then please contact us.

All meters in this brochure are MID-UKCA certified.

ENERGY MONITORING & PRE-PAYMENT WEB PORTALS

METERONLINE - AUTOMATIC SMART METER READING

The straightforward solution for remote metering. Fit a smart meter, register it on MeterOnline, read it remotely.

HOW IT WORKS

MeterOnline gives users the capability to have their own smart meters installed and read them at any location and on any device, from PC to iPhone.

The underlying idea is to make the process simple and use standard smart meters for reliability, ease of installation and cost effectiveness. In the background the service takes care of, 4G/LTE SIM card, airtime and communications security.

In addition to automatically reading the meter, MeterOnline stores,

processes and communicates the readings to simplify the customers end objective, e.g. monitoring renewable generation and export, tracking energy usage or billing customers.

An account holder can have any number of meters, from one up to thousands, and can easily run reports and receive automatic alerts.

For further details visit: meteronline.co.uk

TOPUPMETERS - SMART PREPAY METERS FOR LANDLORDS & TENANTS

Charge for energy with smart prepayment. No money handling means no risk of theft. Consumers pay online for instant electric top-ups. Manage every aspect of your metering remotely with Topupmeters.

HOW IT WORKS

The latest generation smart meters use 4G/LTE mobile phone communications. This means Topups are delivered instantly every time.

Dual-fuel meters for gas and water send data through a short-range wireless connection to the electric meter, which acts as a hub for sending data over the air to our cloud-based system.

The single phase Topup Smart Meter uses 4G/LTE communications for

NB: These are paid for optional services.

instant online Topups. Topupmeters offers the latest technology and online service for recharging energy. Energy is purchased online from the secure payment page. Landlords manage meters remotely from the web portal. All Topupmeters are MID-UKCA certified which is a legal requirement for sub-metering in the UK.

For further details visit: topupmeters.co.uk

GENERATION METERS - SINGLE PHASE

MCG Ref	MIPH100MID/NR/EC	<p>A single phase, single tariff, kWh micro-generation meter.</p> <p>This model is suitable for import, export and net reading applications for solar PV & battery storage applications.</p> <p>This model is supplied complete with an extended cable cover.</p>
CEF Code	2764-4353	
Phase	One	
Amps	100A	
Tariff	Single	
Type	Generation Meter [Net Reading / Solar PV]	
Reading	Import / Export / Net Reading

RFIDMETER METER CARDS - CONTACTLESS

For use ONLY with the RFIDMETER prepayment meter.

- Contactless - instead of needing to place a magnetic stripe card in a meter's slot, these cards need only to be held close enough to transfer credits
- Pre-loaded with a credit value
- Unit is disposable
- These cards have no currency designation, so can be used for British Pounds, Euros, Dollars etc.

SPLIT CORE CURRENT TRANSFORMER

The CTSQSC split core current transformer range has been designed and engineered to be as compact as possible whilst retaining its class 1 accuracy and 5A secondary output.

The material used is of the highest quality, and with the clip top style and built-in 1 metre fly lead it is fast and easy to install and is clearly marked to avoid incorrect installations.

Other sizes are available on request. Please enquire for further details.

- 5A Secondary
- Accuracy Class 1 @ 1.2VA
- 1 Metre fly lead
- White connection = S1
- Black connection = S2
- Output connection: 14 AWG Wire 2.5mm

SOLID CORE CURRENT TRANSFORMER

The CTSQ range is a cost effective, compact current transformer. It is supplied with a DIN Rail adaptor, features a built in hinged terminal cover and has proven to be one of our most popular current transformers.

Please Note: CT cable is not supplied with this product, please purchase separately if required.

Other sizes are available on request. Please enquire for further details.

- Two built-in fixing methods: DIN Rail/Busbar
- Built-in hinged terminal cover
- Compact design
- Primary current from 5A to 250A
