UiPath AI Summit: 2024 Edition

UiPath® The Foundation of Innovation™

Keynote
30-mins

Keynote Session: Transforming Workspaces with AI-powered Automation

GRAHAM SHELDON
Chief Product Officer, UiPath

ROWAN CURRAN
Sr. Analyst, Forrester Research
Guest Speaker

Kickoff the AI Summit discussing the latest trends across the AI ecosystem and highlighting the newest AI-powered capabilities from UiPath.

Industry Highlights
30-mins

Banking & Financial Services
Next-level operations: Why financial services are banking on AI and automation

Insurance
How AI-powered automation is changing the insurance operating model

Manufacturing
Innovating through disruption: The new AI paradigm in manufacturing

Public Sector
AI behind the wheel of public sector innovation

Health & Life Sciences
Putting AI to work in healthcare and life sciences

Product Deep Dives
45-mins

UiPath Autopilot
Autopilot in action: Five use cases that supercharge productivity

AI-powered Discovery
AI-powered Continuous Discovery: Finding 'eureka' insights with AI

AI-powered Document Processing
Building a successful IDP solution: Best practices from seasoned AI experts

Training AI models for IDP
Next-gen AI accelerating intelligent document processing (IDP)

Integration Service & AI Activities
Integration Service: Using connectors and context to power intelligent robots for business

Roadmap & Closing
45-mins

Closing Session: From R&D to Execution – The Future of AI at Work

DR. EDWARD CHALLIS
Head of AI Strategy, UiPath

MARK GEENE
SVP Product, UiPath

LUKE PALAMARA
VP, AI Product Management, UiPath

The UiPath AI roadmap and our on-going research and innovation across Generative and Specialized AI.

All sessions will be recorded and made available on-demand and emailed post-event.

UiPath® The Foundation of Innovation™

ANNOUNCING

Context Grounding

Augment GenAI with your business-specific data

Context Grounding

Improved GenAI responses with business-specific data

Ingest and Index

Make data LLM-ready by converting it to an optimized format (embeddings) that can easily be retrieved and well understood by LLMs

Search and Retrieve

Access specific context and inject into the LLM prompt window as context to generate more reliable, accurate predictions for your domain

UiPath AI Trust Layer

Pave your own path in a crowd of models

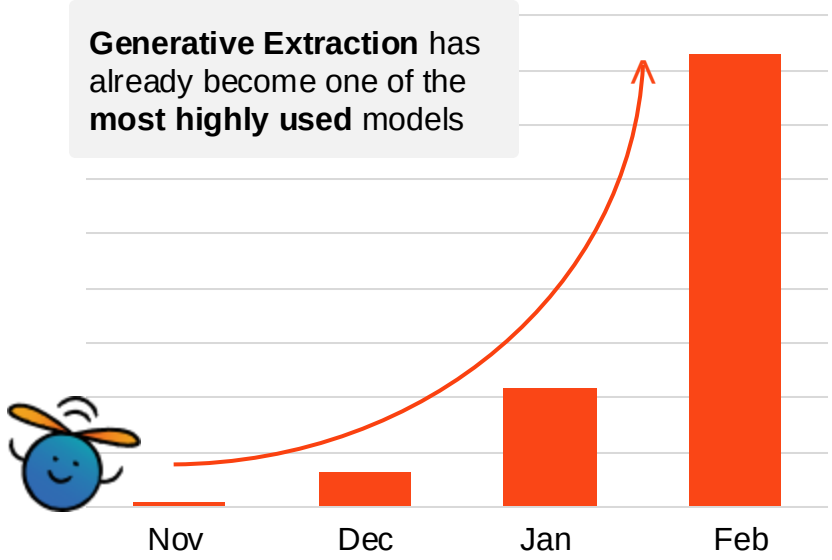
The real impact of Generative AI in UiPath Document Understanding

Generative Extraction has already become one of the **most highly used** models



HUB

"We needed to pull and identify data from thousands of unstructured documents – **a task that we haven't been able to complete manually ever before** due to high complexity and variability of the documents. Now, generative AI capabilities in Document Understanding do that in **less than 5 min – with incredible accuracy and time savings for our team**. Truly impressed with the **time to value and ease of use**, we're looking forward to deploying this intelligent document processing solution at scale."

Thach Nguyen
Director of Digital Innovation, Hub International

ANNOUNCING

UiPath LLMs: DocPath and CommPath

Bringing together the best of Specialized AI & Generative AI

UiPath LLMs

Increased accuracy | Unstructured data | Accelerated time to value

UiPath Communications Mining™

UiPath CommPath

Process communications of varying complexity, including multiple requests and additional context

General Availability April

UiPath Document Understanding™

UiPath DocPath

Process any document out-of-the-box with little to no training required, including lengthy unstructured data and tables

Public Preview Q2

UiPath® The Foundation of Innovation™

ANNOUNCING

New Models, New Connectors

Enabling the use of industry-leading GenAI

Open and enterprise-ready GenAI in your automations

Gen AI Connectors		Models
	OpenAI	**GPT-3, GPT-3.5, GPT-4, GPT-4V**
	Azure Microsoft OpenAI	**GPT-3, GPT-3.5, GPT-4**
	Amazon SageMaker	**Falcon** (Hugging Face*), **Llama2** (Meta*) **any other custom AWS model** *AWS SageMaker is in Public Preview*
	Amazon Bedrock	**Titan, Claude2** (Anthropic*), **Jurassic, Llama2**
	Google Vertex	**PaLM2, Unicorn, Gemini, Gemini Vision**
watsonx	**IBM WatsonX**	**Granite, Llama2** Built by **IBM** using **UiPath Connector Builder** *(Public Preview)*
	Anthropic	**Claude2, Claude Instant**
UiPath®	**Connector Builder**	**Build your own AI-based connector**

*vendor

watsonx + UiPath® The Foundation of Innovation™

- **Collaboration**: Developed using UiPath's Connector Builder by IBM
- **Foundational Models**: Covers key models including Granite and Llama2
- **Use Cases**: Summarization, Q&A, and task classification
- **Benefits**: Seamless integration into existing UiPath workflows, expanding capabilities
- **Availability**: Now in the Integration Service Connector Catalog

UiPath® The Foundation of Innovation™

ANNOUNCING

Autopilot™ for Developers & Testers

Now in Public Preview!

UiPath Autopilot™ for Developers and Testers

Add rocket fuel to your productivity in *UiPath Studio, Apps, and Test Suite*

Developers

Want to create workflows, apps, and expressions faster

With Autopilot for Developers, you can:

- Create automations, apps, and VB expressions with natural language
- Convert legacy forms and PDFs to automation-powered apps
- Get contextual "next best action" guidance as you're building automations
- Generate endless test cases for your automations and apps

GA in June

Testers

Generate test cases to ensure reliable apps and automations

With Autopilot for Testers, you can:

- Conduct quick checks and get suggestions to improve requirements
- Generate critical tests rapidly
- Convert manual steps to executable test automations seamlessly
- Quickly identify error patterns from multiple tests

GA in June

"My favorite UiPath product is the Autopilot & Coded Automations, which has been a game-changer in how I approach automation projects. It's not just about ensuring the reliability of automated processes but also about instilling confidence in the solutions we deploy."

Sai Kiran, UiPath MVP | Senior Automation Developer @Cigniti

"Turning requirements and epics into test cases can be a real drag – it takes time and you risk missing critical aspects. Autopilot changes this. It checks your requirements and generates tests for you, getting you ready to test and automate much faster."

Roman Tobler, UiPath MVP | CEO @Routinuum
