

# UiPath™ Automation Hub

## Discover and manage automation opportunities in one place

Centrally capture and manage automation opportunities and process improvements, prioritized by impact and ROI.

### Benefits

Centralized Management

Faster Implementation

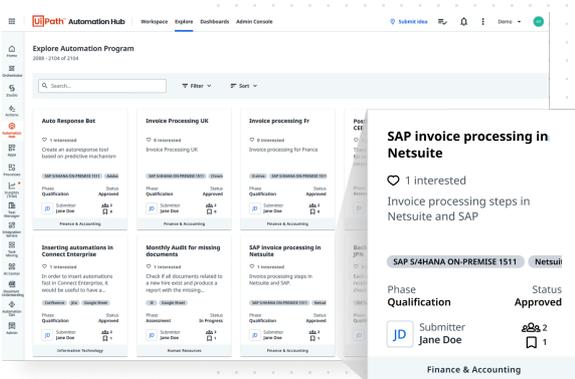

Effective Prioritization

Easy Reporting

## Let's dive deeper

### Centralized Management

Track everything from idea to production in one place—with visibility and control

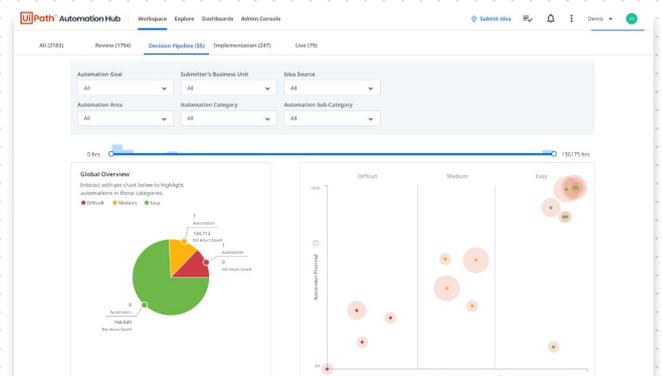

- **Collect ideas** by crowdsourcing or using mining technologies for data-driven discovery.
- **Create a strong business case** on top of the data collected from your SMEs or discovery products—getting an end-to-end picture.
- **Centralize visibility and control** over the progress of automation and process improvement projects and their iterations.

### Effective Prioritization

Invest in opportunities that matter to your business by prioritizing them based on your KPIs

- **Evaluate opportunities** using pre-built assessments or **customize them based on KPIs that matter to your company**—maximizing for business impact
- Leverage tools designed to help you **make informed decisions on your pipeline**—ROI calculator, graphs, dashboards, filtering, etc.

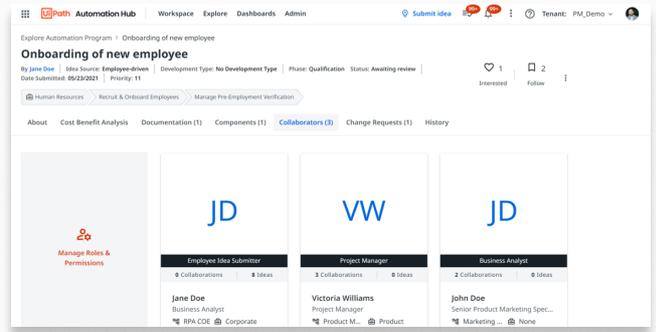

## Faster Implementation

Leverage tools designed to help you make informed decisions on your pipeline—ROI calculator, graphs, dashboards, filtering, etc.

- Gain trust and get buy in from stakeholders with data that proves value
- Store all project-related files in one place and leverage integrations with platform or third-party tools for streamlined experience
- Enable process SMEs, developers, and the CoE to effectively collaborate to accelerate the automation lifecycle

## Easy reporting

Track meaningful metrics and visualize the performance of your automation program

- Utilize pre-built dashboards with analytics on automation program performance, cost, and planning
- Leverage the integration with Insights to reflect the status and performance of your automation program with fully customizable dashboard templates

## Who is Automation Hub for?

### Automation or Process Improvement Leaders

- Gain centralized visibility and control over ideas
- Increase your program's ROI by effectively prioritizing opportunities
- Facilitate collaboration within teams
- Easily track progress and impact

### Automation and Citizen Developers

- Access all needed information in one place
- Easily cooperate with others on project implementation
- Share your personal time-saving automations
- Join community focused on enterprise innovation and personal growth

### Employees

- Get a robot to do the work you hate
- Be rewarded for ideas and make impact by sharing your experience
- Collaborate and learn from others
- Uncover ready-to-go automations
