# **Ui Path**<sup>®</sup> Automation Hub

## **Discover and manage automation** opportunities in one place.

Automation Hub helps you centrally manage the automation opportunities pipeline, increase your automation program's ROI by better prioritizing automation ideas, and broaden the availability of your automations.

Automation Hub fosters an open, transparent, and collaborative automation community

**Enterprise Community** Workspace

**Automation Store** 

**Automation Opportunities Pipeline Management** 

**Automation Discovery** Integrations

## Turn great ideas from anyone into great automations for everyone

#### Automation Opportunities **Pipeline Management**

#### Centrally manage your automation ideas

- Track automation opportunities in a single location-whether they are from Business Users, Citizen Developers, CoE, or scientifically discovered via Process Mining and Task Mining solutions
- Customize idea assessment to prioritize opportunities based on KPIs that matter to your company-maximizing for business impact

ath

Capture and collaborate on automation opportunities

- Connect to submit automation ideas and share process documentation
- Enable collaboration between SMEs,
- developers, and the CoE to accelerate the automation projects development
