

UiPath™ Studio

The automation canvas for everyone

With a common foundation and dedicated activities sets for different coding skills, the Studio family of products offers everyone the ability to build their own robot.

A Citizen Developer can start off the task automation in StudioX, an experienced RPA developer from the Center of Excellence can enhance it in Studio and distribute to the entire company for deployment in UiPath Assistant.

Documentation, tutorials and free classes

Find out the right learning path for your needs and skills. Our products come complete with documentation, tutorials and demos as well as complete training programs to upgrade your skill level.

A dark teal banner with three white-bordered boxes. Each box contains a small icon, a title, and a brief description. The first box has a play button icon, the title 'Watch', and the text 'Watch a short introduction video'. The second box has a play button icon, the title 'Tutorials', and the text 'Learn how to build automations following step by step instructions'. The third box has a graduation cap icon, the title 'Academy', and the text 'Take free training on the UiPath Academy'.

UiPath Automation Cloud

Automation Ops (Preview)

Create governance policies to enforce your organization's rules and configurations for UiPath products. After creation, all policies must be deployed to take effect.

| Name | Description | Product | Prio... |
|--------------------|---|------------|---------|
| StudioX beginne... | Limited access to package streams | StudioX | 1 |
| RPA developers | Full access to all automation features | Studio | 1 |
| CoE | Center of Excellency - full access | Studio Pro | 1 |
| Test Automation | QA engineers and Test Automation develop... | Studio Pro | 2 |
| StudioX Advanced | Advanced Citizen Developers | StudioX | 2 |

Governance made simple

The Studio products offer organization level governance through its integration with **Automation Ops**. Adjust the level of control to best suit your company setup and your type of users. Allow your employees the freedom to automate in a controlled environment.

Rules can be adjusted to different levels for more experienced Studio users compared to StudioX business users and organizational development standards can be enforced through the Workflow Analyzer.

Source control

Directly integrated with Git, TFS, VSTS, and SVN for better collaboration in teams .

Powerfull debugging

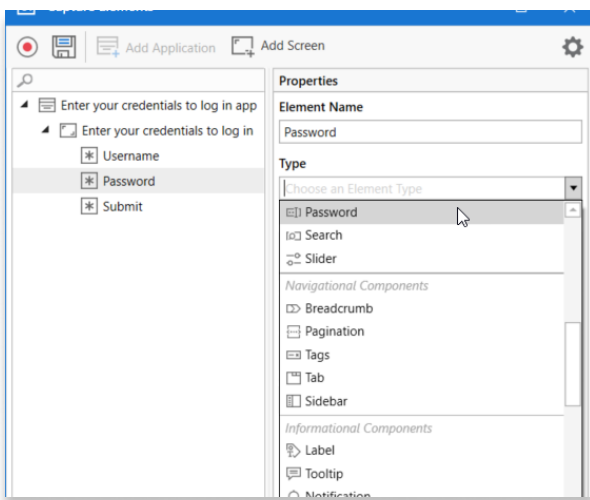

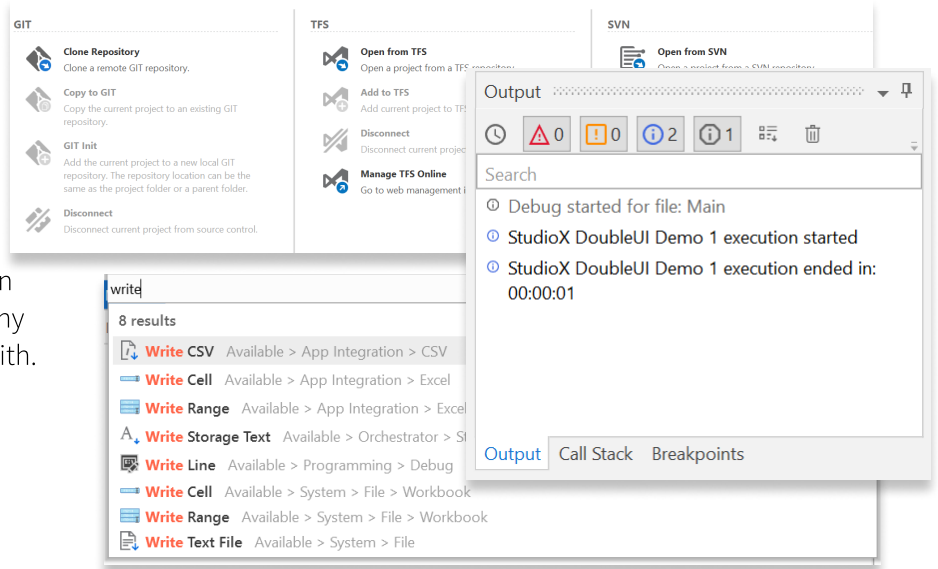

Ensure quality code through extensive debugging tools and logging.

Automate any User Interface

Combine selectors, text Computer vision and Image identification to automate any desktop or web application you work with.

Command Pallete

Search across all automation resources (libraries, activities, projects, and open workflows).

Attended or Unattended? How about both

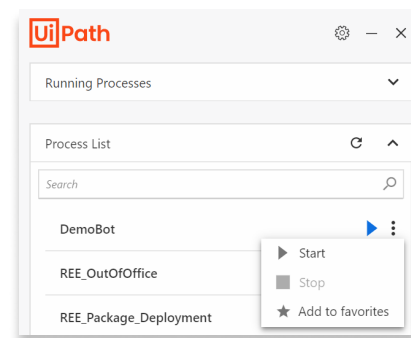

Deploy robots at scale throughout your organization. Run locally with UiPath Assistant, manage securely with UiPath Orchestrator.

Resilient, sustainable development

Define and use your UI elements or your data entities once, and reuse them across projects, departments, and in newer versions of your automation.

Share your repositories with colleagues and store your data in the cloud for easy access, and more reliable automation projects.

Object Repository and Data Entities help your team develop faster and better across the various projects.

Thank you for choosing UiPath

To test out any of the Studio versions, please navigate to the UiPath website or reach out to one of our sales colleagues.
