

# Move from Test Suite to **Test Cloud**

## Upgrade to agentic software testing.

### Software delivery is accelerating. Testing must keep up.

Software delivery is moving faster than ever. AI is helping developers complete coding tasks 55.8%<sup>1</sup> faster, yet 72%<sup>2</sup> of developers still revise more than 40%<sup>2</sup> of AI-generated code. That means more change, more testing demand, and more risk if testing does not keep pace.

### Meet Test Cloud, our agentic software testing solution that's built on what works — and is designed for what's next.

Test Cloud builds on the trusted Test Suite foundation you already rely on, while adding the new agentic software testing capabilities only available in Test Cloud. Teams keep their core testing workflows and gain a faster, more scalable path to modern software testing.

#### Keep from Test Suite

- Test design, automation, execution, and management
- Web, mobile, desktop, SAP, database, and API automation
- Enterprise-grade architecture, security, and governance

#### Gain with Test Cloud

- Self-healing test automation
- Agentic manual test generation
- Autopilot chat and charts in Test Manager
- Identification of obsolete tests
- Autonomous test execution and exploration
- Agentic performance testing
- Studio Web for software testing
- Accessibility testing, recording, and live streaming
- SAP RISE-compliant
- Patented SAP Change Impact Analysis technology

### A simpler move. A smarter model.

Not only do you gain access to new, emerging agentic technology, you also get a streamlined pricing and licensing model. And it's easy to move from Test Suite to Test Cloud: it's mostly a swap from Flex Pricing to Unified Pricing. Unified Pricing helps you pay for value rather than shelfware, scale more easily across teams and projects, and access the latest software testing features in Test Cloud. Existing testing investments are designed to carry forward, with migration utilities and guidance available where asset movement is needed.

### Real value. Real customer results.

Our straightforward pricing and innovative features have helped organizations transform quality and deliver meaningful outcomes:

**Cisco** cut manual testing by 50% and projected more than \$3M in savings.

**EDF** reached 90% automation, 6x faster execution, and 80% cost reduction.

**NatWest** achieved 4x faster test creation, 95% reduction in test-start time, and 75% lower maintenance costs.

**Eureko** reduced processing times by 70% and saved 15,000+ hours annually.

### Recognized by the analysts.

UiPath Test Cloud is recognized as a leader by Gartner, Forrester, and IDC. **Organizations using UiPath testing capabilities have seen \$4M average annual savings, 529% three-year ROI, and 6-month payback.**
