

State of the **N**aition

Marco Eggerling
Field CISO International

If cybercrime were a country...

...it would be the world's third-largest economy. Completely without governance.

*The question isn't
whether to **govern** AI.
It's whether you'll
lead or follow.*

The Bad Guys

Steal your data.

Sell it. Weaponize it. Ransom it.
Monetize it on the dark web
within hours.

We Do It Better

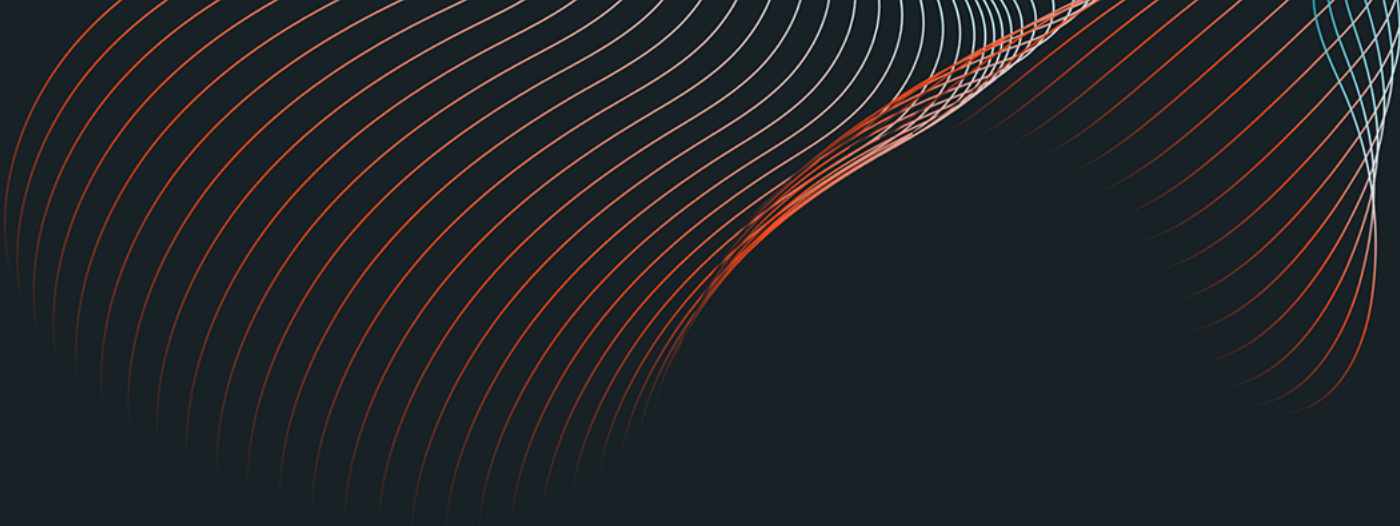

AI makes sense of data.

Automates what slows us down.
Augments human decision-making.
Delivers value at machine speed.

Agentic Automation

Security & SOAR workflows - powered by UiPath.
With great autonomy comes great responsibility: **AI governance is not optional.**

Thank you
