

# Transform with AI

**Join us at the world's premier event  
focusing on AI and automation.**

Automation is the catalyst that turns AI's potential into real-world impact. At FORWARD + TechEd, October 22–24 in Las Vegas, you'll get the knowledge and skills you need to transform with AI. Join thousands of your colleagues from around the world as you gain the knowledge and skills you need to architect a new future of work.

## The big picture on AI's future

Mainstage keynotes by UiPath leaders, renowned thinkers, top industry watchers, and expert analysts help you see how the promise of AI and automation will play out in the years to come—so you can make smarter decisions about the here-and-now.

## A full TechEd event

There's so much technical content to cover that we've decided to make TechEd a full two-day event, with even more sessions and workshops. Don't miss this hands-on, deep-dive into the UiPath technology at the heart of AI-led transformation.

## Industry and process context

How do you turn the promise of AI and automation into solutions that actually help businesses be more efficient, more innovative, and more productive? You've come to the right place. Join us for the industry and process viewpoints that put a practical spin on theoretical perspective. We'll help you understand our point of view that the newest thing in AI is the oldest: profit.

## Expert insight

Looking to understand how to turn the AI "blah" into AI "ahhh?" You'll get 1-on-1 access to the UiPath and partner experts who can help you turn your toughest questions into "ah-ha" moments.

## A global community of automation innovators

**> 4,000**

of your colleagues, friends, and fellow automation mavens will be on hand to share ideas, make new connections, and do a little celebrating.
