IMPORTANT ALERT

We are continuously monitoring internet activities for any signs of cheating or misguided information. We are aware that there are a large number of websites who are **selling fake exams** and charging substantial prices for them. We will take immediate action if we find that the real exams have been compromised. **Please do not spend money or rely on such cheat sites.**

Introduction

Designed based on the UiPath Automation Business Analyst guidelines, the UiPath Certified Professional Automation Business Analyst Professional aims to assess knowledge and skills in gathering requirements, process discovery, process analysis, and designing and implementing automation using UiPath products.

The Automation Business Analyst Professional is a credential intended for mid-career Business Analysts who possess a breadth of knowledge and industry experience in business process automation. Candidates seeking to become an Automation Business Analyst Professional preferably have completed the UiPath Academy courses listed as recommended training.

The Automation Business Analyst Professional is recommended for roles such as Automation Business Analyst, Project Manager, Solution Architects, and Change/Transformation Managers.

Target Audience

The target audience for the UiPath Certified Automation Business Analyst Professional Exam includes:

- Experienced Business Analyst who wants to showcase their competencies in process automation domain
- Roles where Business Analysis expertise is highly valued, such as Automation Business Analyst, Project Manager, Solution Architects, and Change/Transformation Managers, etc.

Minimally Qualified Candidate

The Minimally Qualified Candidate (MQC) is an individual with the following qualifications:

- 2+ years of experience as a Business Analyst and have participated in at least five automation projects using UiPath Solutions
- In-depth knowledge of business analysis best practices and standards described in BABOK ® (Business Analyst Body of Knowledge ®) or similar
- Technically proficient and possesses the knowledge/skills to gather and analyze requirements for new automation projects as well as improving the existing processes.

Products

The exam covers the following UiPath products (version 2024.10 and above):

- Automation Solutions
 - UiPath Studio
 - UiPath Robots
 - UiPath Orchestrator
- AI Solutions
 - UiPath Document Understanding
 - UiPath Communications Mining
 - Chatbots
 - UiPath Insights
 - UiPath Apps
 - UiPath AI Center
- Discovery Solutions
 - UiPath Process Mining
 - UiPath Task Mining
 - UiPath Task Capture
 - UiPath Automation Hub

Exam Domains/Exam Sections

The Automation Business Analyst Associate Exam contains the following exam sections:

- Business case and technical validation
- Process analysis
- Automation development and testing
- UAT
- Core UiPath Solutions
- AI UiPath Solutions
- Discovery UiPath Solutions
- UiPath Implementation Methodology
- UiPath Platform
- Agentic

Exam Topics

Tasks performed by the Minimally Qualified Candidate:

Business case and technical validation

- Describe intake mechanisms for automation pipeline creation (intake form, Automation Hub).
- Use Business Case template to create a business case for process selected for automation.

Process analysis

- Describe value metrics taxonomy (productivity, quality, risk, speed/agility, experience).
- Describe and create the Agent Definition Document.
- Agent Description - define and explain the concepts: agent story, functional requirements, business requirements, non-functional requirements, triggers
- Agent Solution - describe the concepts: system prompts, user prompts, context grounding, tools, guardrails, escalations

Automation development and testing

- Manage the automation change control process.
- Analyze the proposed changes with stakeholders and apply the KRAC (keep/remove/add/change) approach.
- Update the Process Design Document (PDD) to include request changes and the detailed step-by-step description for each change implementation.

UAT

- Dealing with new or unexpected scenarios in the UAT stage.

Core UiPath Solutions

- Describe processes executed with the different robot types (attended, unattended, human-in-the-loop, OS robot availability).
- Describe use cases of multiple products used jointly to solve business problems.
- Describe UiPath Studio REFramework (code structure: Dispatcher, Performer + error and exception types).
- Describe what UiPath Orchestrator is and does.
- List the different types of logs in UiPath Orchestrator.
- Actions - role in the platform
- Insights - role in the platform
- Test Manager - role in the platform
- Describe UiPath Assistant and its applications.
- Describe and use Autopilot for Everyone (A4E) in the context of a Business Analyst.
- Integration Service - role in the platform
- UiPath Apps - usage and role in the platform, document app mock-up and functions

AI UiPath Solutions

- Define what UiPath Document Understanding is.
- Distinguish between structured, unstructured, and semi-structured documents that can be processed with Document Understanding.
- Distinguish between types of data extraction methodology (Rule-based, Model-based).
- Describe the number of samples needed to be processed with Document Understanding depending on document types.
- Describe the Document Understanding framework.
- Describe what UiPath AI Center is and explain how Specialized Models can be used in processes.
- Define what Communications Mining is.
- Describe the process of using Communications Mining as an end user.
- Distinguish between Generative and specialized AI.
- Describe the usage of computer vision.

Discovery UiPath Solutions

- Define what Task Mining is and when it is suitable to use it.
- Define what Process Mining is and when it is suitable to use it.
- Define what Automation Hub is and when it is suitable to use it.

UiPath Implementation Methodology

- Outline the roles and responsibilities of a Business Analyst throughout a project implementation (automation and agentic).

UiPath Platform

- Describe UiPath Platform and deployment options (cloud, on-premises, hybrid)

Agentic

- Explain what agentic automation is.
- Differentiate between regular Automation and agentic automation and when to apply.
- Describe Process Modeling in the context of Maestro. (BPMN)
- Describe the agentic components and their interaction - context grounding, tools, escalations

Environments, applications, and/or tools

The Minimally Qualified Candidate (MQC) should be comfortable working with the following environments, applications, and/or tools:

- A general familiarity of the contents in BABOK ®
- Microsoft Excel
- Microsoft Office Suite (e.g., Exchange and Outlook)
- On-premises vs. cloud
- Browsers (IE, Chrome, etc.)
- UiPath Studio and UiPath Studio – Robotic Enterprise Framework

- UiPath Orchestrator
- UiPath Robots
- UiPath Automation Methodology

Recommended training and hands-on experience

The following represents the recommended learning path the Minimally Qualified Candidate (MQC) can take to prepare for the UiPath Certified Professional Automation Business Analyst Professional Exam:

Training Options:

-  **UiPath Academy** [UiPath Academy Automation Business Analyst Professional Training](#)
 - AND -
 - Other training or self-learning sources that cover the subjects listed in this document to prepare for the exam.

Recommended Exam Preparation

In addition to the recommended learning path, the practice test is an additional study tool to prepare for the UiPath Automation Business Analyst Professional Exam.

- [UiPath Automation Business Analyst Professional Practice Test](#)
