Autopilot™ for developers

UiPath Platform Spotlight: The June Release Event

Event agenda

UiPath The Foundation of Innovation™

|	
Keynote *30 min*	**Build higher-quality automations, faster than ever, with UiPath Autopilot™ and GenAI** **Craig Dewar** VP Product Marketing, UiPath
AI Session *20 min*	**AI-powered building blocks** **Scott Schoenberger** Sr. Manager, Product Management, UiPath
AI Session *20 min*	**AI built for your documents** **George Barnett** Director, Product Management, UiPath **Betty Kim** Director, Product Management, UiPath

Autopilot breakouts
20 min

Autopilot for developers

**Magda Neagu**
Director
Product Marketing,
UiPath

Alexandru Roman
Director
Product Management,
UiPath

Autopilot for testers

Ingo Phillip
Sr. Director
Product Management
UiPath

The UiPath June 2024 Release:
Build higher-quality automations, faster than ever, with UiPath Autopilot™ and GenAI.

UiPath **The Foundation of Innovation™**

Introducing UiPath Autopilot™

We are infusing GenAI deeply into the UiPath Business Automation Platform to redefine the Enterprise Automation category. Today, we are excited to deliver on the promise of AI-powered productivity with the release of UiPath Autopilot™ for developers and testers.

1

AI-powered building blocks

AI can simplify common developer tasks, like working with forms and unstructured text. To deliver on this promise, we have created AI-powered building blocks for UiPath Studio leveraging a combination of GenAI and specialized AI—including our award-winning Clipboard AI.

2

AI built for your documents

The best document understanding solution just got better. UiPath LLMs now power improved data extraction. Validation gets a second opinion from GenAI, and there are new human in the loop experiences.

3

Enterprise-grade cloud

Automation is a can't-fail part of your IT landscape. We continue to deliver on your requirements for an enterprise-grade foundation to run and optimize a mission-critical automation program at high scale.

4

AI at work: the UiPath Business Automation Platform

Discover

Identify the highest-ROI opportunities for continuous process optimization and automation using the power of AI

| PROCESS MINING | TASK MINING | COMMUNICATIONS MINING | IDEA CAPTURE & MANAGEMENT |

Automate

Rapidly build AI-powered automation that seamlessly collaborates with people and systems to transform every facet of work

| UI + API AUTOMATION | LOW-CODE DEVELOPMENT | GENERATIVE AI & EXPERIENCES | INTELLIGENT DOCUMENT PROCESSING & SPECIALIZED AI | PROCESS ORCHESTRATION |

Operate

Establish an enterprise-grade foundation to run and optimize a mission-critical automation program at high scale

| REAL-TIME & TREND ANALYTICS | CONTINUOUS TESTING | UNIFIED MANAGEMENT & GOVERNANCE | CLOUD-FIRST FLEXIBILITY |

Your People

Your Applications
Systems of record | Communications and collaboration | Personal productivity

Your Processes

UiPath Autopilot™

UiPath Autopilot™ is a new set of AI-powered experiences across the UiPath Business Automation Platform that make every user from interns to CEOs more productive.

…for Developers	…for Testers	…for Business Analysts	…for Everyone
Build automation solutions in a breeze	Deliver high-quality applications & automations rapidly at scale	Discover more automations everywhere	Complete everyday, time-consuming tasks
Create automations, apps, and expressions in *UiPath Studio and Apps*	**Accelerate every phase of the testing lifecycle *with UiPath Test Suite***	**Find automation potential in *UiPath Process Mining & Communications Mining***	**Be more productive with *UiPath Assistant + Clipboard AI***

June 2024 Release

Autopilot ™ for the Business Automation Platform

1. Enable every employee to leverage AI for productivity

2. Provide cross-platform AI solutions on Windows, Mac, and Web

3. Govern your AI program at enterprise scale with the UiPath Platform & AI Trust Layer

UiPath Autopilot™ for developers

What

AI-powered automation development that takes you from natural language to workflow generation in seconds. Features include:
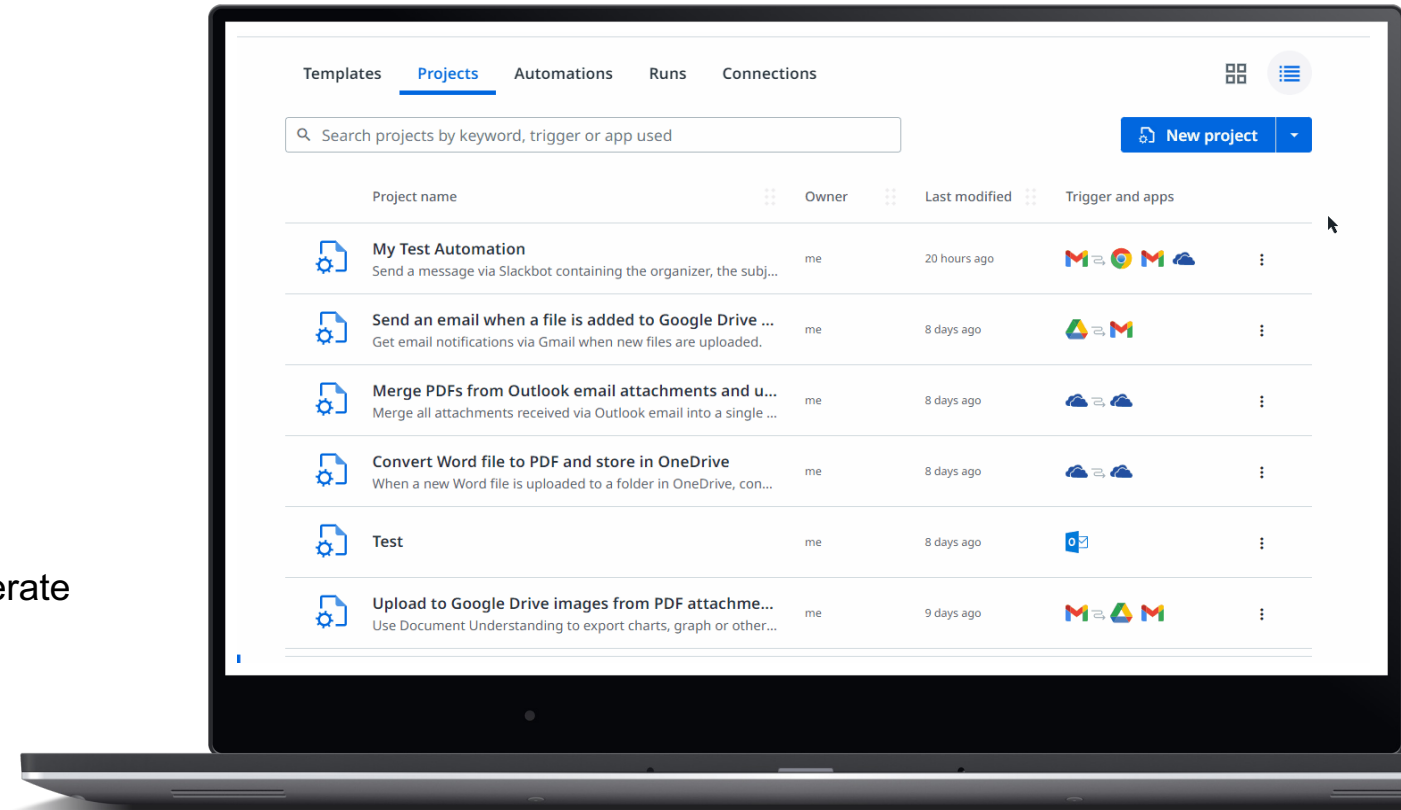

- Text to workflow
- Text to expressions
- Text to code
- PDF form, text, or image to UiPath Apps

Why

- Speed up development times
- Empower non-technical people to define variables and generate complex workflows

Where and when

- Generally available July

Customer Feedback

*I'm particularly excited about how Autopilot will continue to **lower the barriers to automation entry** for our cohort of citizen developers at dentsu.*

Flo Ye
Director of Automation Solutions, dentsu

*The new Autopilot capabilities at UiPath **enable citizen development in a novel way**. Autopilot for Studio, in particular, means that learning programming skills, low code or not, is becoming less critical than learning about technology capabilities. Rather than inventing new automations from scratch, citizen developers can focus on tweaking the process, so Autopilot can normalize the data making it ready for the automated downstream processes. We are already incorporating this vision into our next wave of citizen developer training."*

Hemant Porwal
Executive Vice President, Supply Chain and Operations
Wesco

***UiPath favorites are Autopilot and coded automations**, which have been a game-changers in how I approach automation projects. It's not just about ensuring the reliability of automated processes but also about instilling confidence in the solutions we deploy."*

Sai Kiran,
UiPath MVP and Senior Automation Developer
Cigniti

UiPath Integrates with Microsoft Copilot for Microsoft 365

What

The UiPath Plugin for Copilot for Microsoft 365 enables powerful, end-to-end enterprise automations by leveraging the UiPath AI-powered automation platform, including intelligent document processing specialized AI capabilities.

Customers will have access to a pre-built automation library to run automations that complete common, repetitive tasks along with specialized automations that are purpose-built for function- or industry-specific tasks. Users can also discover and run automations that their company has developed.

Why

Automate end to end, including digital paperwork & AI orchestration

- Automate over modern APIs using integration service
- UI Automation powered by best-in-class computer vision
- Automate documents & emails with intelligent document processing
- Augment purpose built UiPath LLMs with best of breed foundational models
- Deploy on new documents in days with generative labeling & classification
- Enables Copilot users to orchestrate experiences across enterprise systems

UiPath® The Foundation of Innovation™

UiPath Autopilot™ and Copilot for Microsoft 365

UiPath Integrates with Microsoft Copilot for Microsoft 365

What

The UiPath Plugin for Copilot for Microsoft 365 enables powerful, end-to-end enterprise automations by leveraging the UiPath AI-powered automation platform, including intelligent document processing specialized AI capabilities.

Customers will have access to a pre-built automation library to run automations that complete common, repetitive tasks along with specialized automations that are purpose-built for function- or industry-specific tasks. Users can also discover and run automations that their company has developed.

Why

Automate end to end, including digital paperwork & AI orchestration

- Automate over modern APIs using integration service
- UI Automation powered by best-in-class computer vision
- Automate documents & emails with intelligent document processing
- Augment purpose built UiPath LLMs with best of breed foundational models
- Deploy on new documents in days with generative labeling & classification
- Enables Copilot users to orchestrate experiences across enterprise systems

A bigger picture
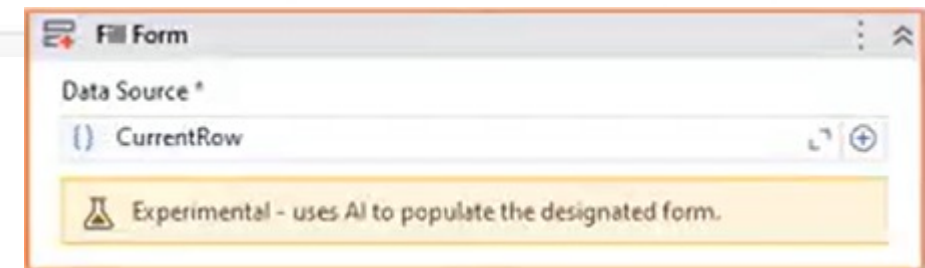

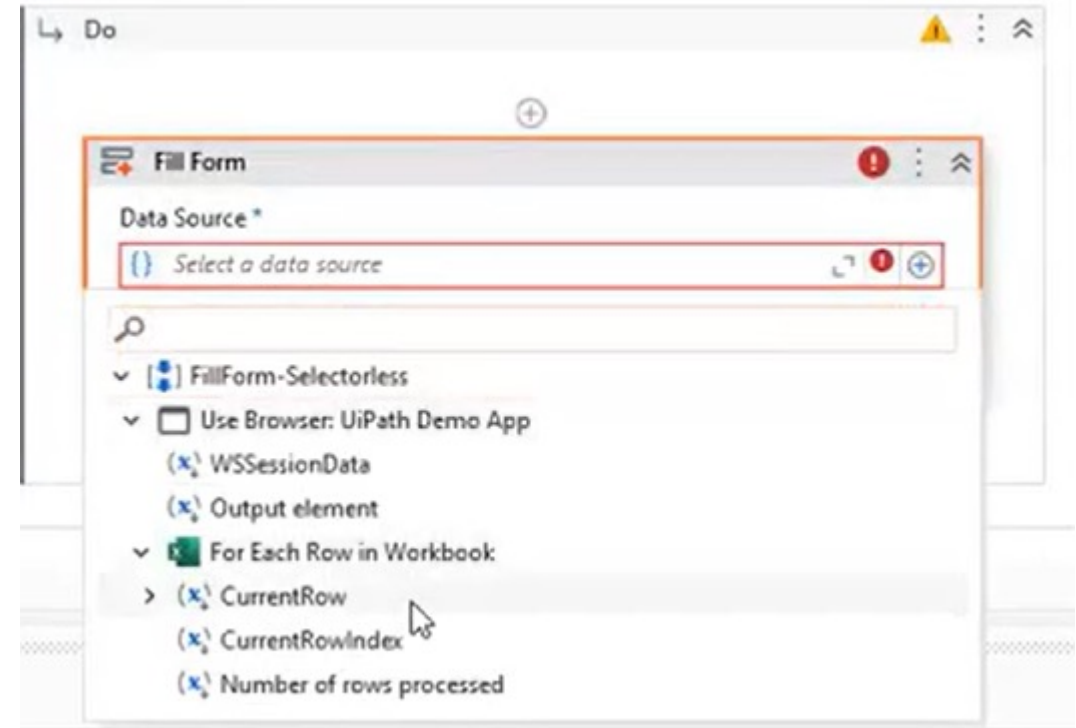

GenAI activities and intelligent form handling

What

- **GenAI activities:** a curated collection of Studio activities that **simplify common GenAI use cases** for automation developers.

- **Intelligent UI form handling:** Improved UI forms handling with **specialized A**I and learnings from Clipboard AI.

- **Context grounding:** Ability to incorporate business-specific data to improve **GenAI prediction accuracy** and **reduce hallucinations.**

- **Trust layer:** Governance by company data and policies to **improve usage confidence** of GenAI-powered capabilities.

Why

- Simplify access and usage of common GenAI features

- Infuse advanced UiPath AI technology into Studio to lower time to value and increase resilience

- Improve GenAI ability to better understand context and output more accurate information.

- Confidence and trust in using GenAI in automations

AI built for your documents

What

- Improved data extraction: UiPath LLMs (DocPath and CommPath)
- Active learning: Allows customers to train their own models in Document Understanding
- Generative validation: offers a 'second opinion' by GenAI on the data extracted from documents

Why

- UiPath LLMs enable out-of-the-box processing of any document or message with increased accuracy, speed, and scale
- Active learning brings 80% speed improvement to document training
- Generative validation can greatly reduce the time spent in human data validation, improving straight-through processing

Fewer extraction errors with UiPath DocPath

Gen AI tool	Tier 1 IDP vendor	UiPath pre DocPath	UiPath DocPath
35.6%	13.1%	6.7%	4.7%

Enterprise-grade cloud

What

- **FedRAMP authorization:** UiPath Automation Cloud Public Sector is now available
- **New Automation Cloud Regions:** Now also available in UK and India
- **Automation Cloud Delayed Update Ring:** Now available with EU support
- **Solutions Management:** Tools to manage the complete lifecycle of an automation project

Why

- FedRAMP provides US Public Sector with new authorization to consume cloud solutions. UiPath is now certified!
- More regions helps with local data residency requirements
- Delayed Update Ring allows customers to test 14 days before new features are implemented in production
- Solutions Management simplifies dev / test / production and lowers program TCO

Q&A

UiPath Reboot™ Work.
