Ui Path Al Center

Manage and scale AI to achieve faster ROI

Struggling to apply AI?

UiPath AI Center helps you orchestrate all moving pieces of AI - deploy, consume, manage, and improve machine learning models. Let AI Center do the heavy lifting so you can reap the benefits from new cognitive workflows while focusing on your business.

Benefits

AI Center bridges the gap between RPA

and data science teams and enables you to instantly apply the limitless cognitive power of AI to any software currently being automated by RPA.

Scalability

Faster ROI

Easily deploy ML models

Package your models, upload them directly to AI Center, and make them available for robots to consume within minutes.

Alternatively, select UiPath out-of-the-box ML models or pre-trained ML models from UiPath AI technology partners that work best for your workflows.

Drag and drop AI

Choose a model and drag and drop it to your workflow right in Studio to accelerate the porential of your automations.

Select an AI skill suited to your business needs from a drop down.

Continuously improve your models by bringing

humans to handle exceptions, validate data and

1 - 1 of 1

Model governance

Gain end-to-end visibility of model versioning and updates.

Your RPA teams will know when models have been updated, and your data science teams will know how your models are being used in production.
