

UiPath™ Task Capture

Accurate and intelligent business process documentation.

With Task Capture, you can easily bridge the documentation gap between Process Experts and RPA or Citizen Developers to accelerate automation development and process improvements.

Easily create process maps and documentation for your business processes

Process Mapping and Recording

Shared Documentation

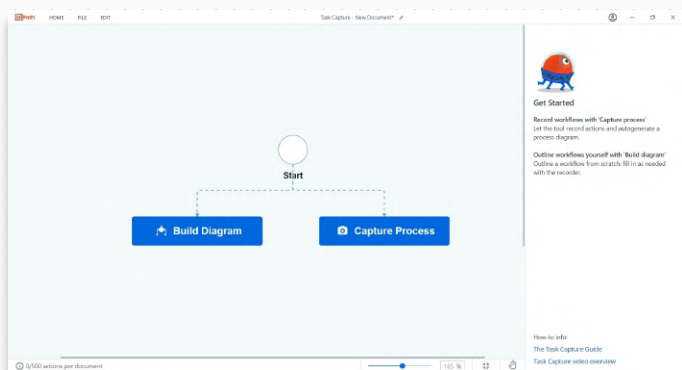

Editing Toolkit

Accelerated Development

Accelerate and modernize process documentation

Business Process Mapping and Recording

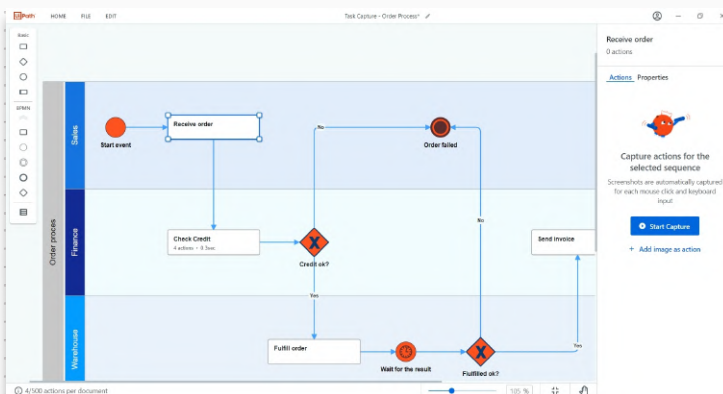

Build or record comprehensive process diagrams with ease

- **Build Diagram:** Manually create a workflow diagram with drag-and-drop ease
- **Capture Process:** Automatically record the way you perform a process, step-by-step with the built-in recorder

Editing Toolkit

Add details and edit with ease

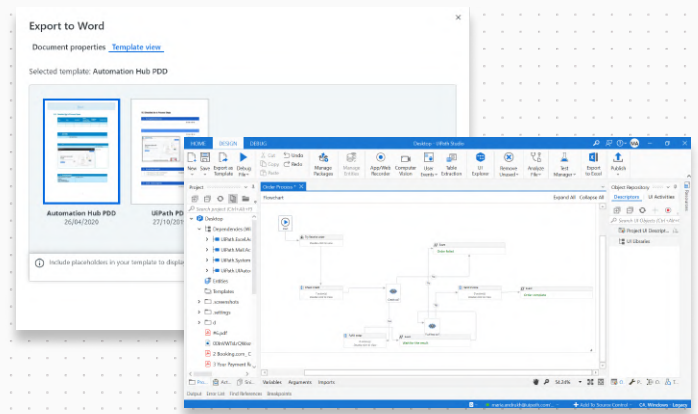

- Leverage rich diagram and image editor capabilities
- Automatically detect and merge same-screen actions
- Combine multiple documents
- Comply with business standards by leveraging BPMN elements

Shared Documentation

Extend the value of your process documentation across your business

- Export as a Process Definition Document (PDD) or JPEG to share across your business stakeholders
- Export as a .xaml file for use in UiPath Studio or UiPath StudioX
- Save and share documentation files for easy collaboration and review with other process SMEs

Integrated Documentation Solution

UiPath™ Automation Hub

UiPath™ Test Suite

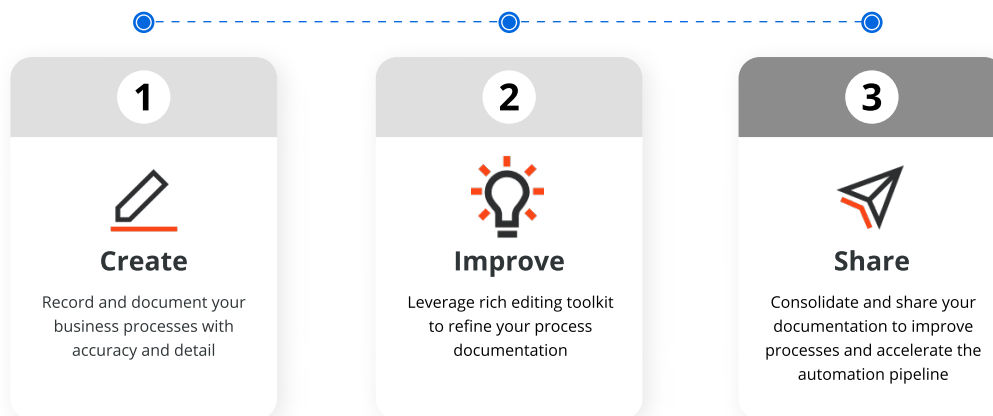

UiPath™ Task Mining

Accelerated Development

Get the documentation to the right teams by easily exporting or publishing

- PDD or XAML files can be published straight to Automation Hub to **accelerate automation development efforts**
- Share documentation to Test Manager to **reduce time spent on creating manual test cases**
- Refine the Task Mining results to **enhance the output files** and to ensure the CoE team has enough data to analyze the process.

How to leverage Task Capture

Transform employee knowledge into organizational wisdom with UiPath Task Capture
