

The background of the poster is a night-time photograph of the Munich skyline, with the illuminated spires of the Frauenkirche cathedral being the most prominent feature. Overlaid on this is a large, vibrant graphic consisting of two flowing, translucent ribbons. One ribbon is a mix of blue and teal, arching from the left side of the frame. The other is a mix of orange and red, arching from the right side. These ribbons meet and swirl around the central text. Scattered across the dark sky are several small, solid-colored squares (orange and teal) and white four-pointed stars.

Redesign the *workflow*, not just the tool.

Pick the right AI for the right job — rules, analytics, or agents.

Build trust — invest in evaluation and reduce “AI slop.”

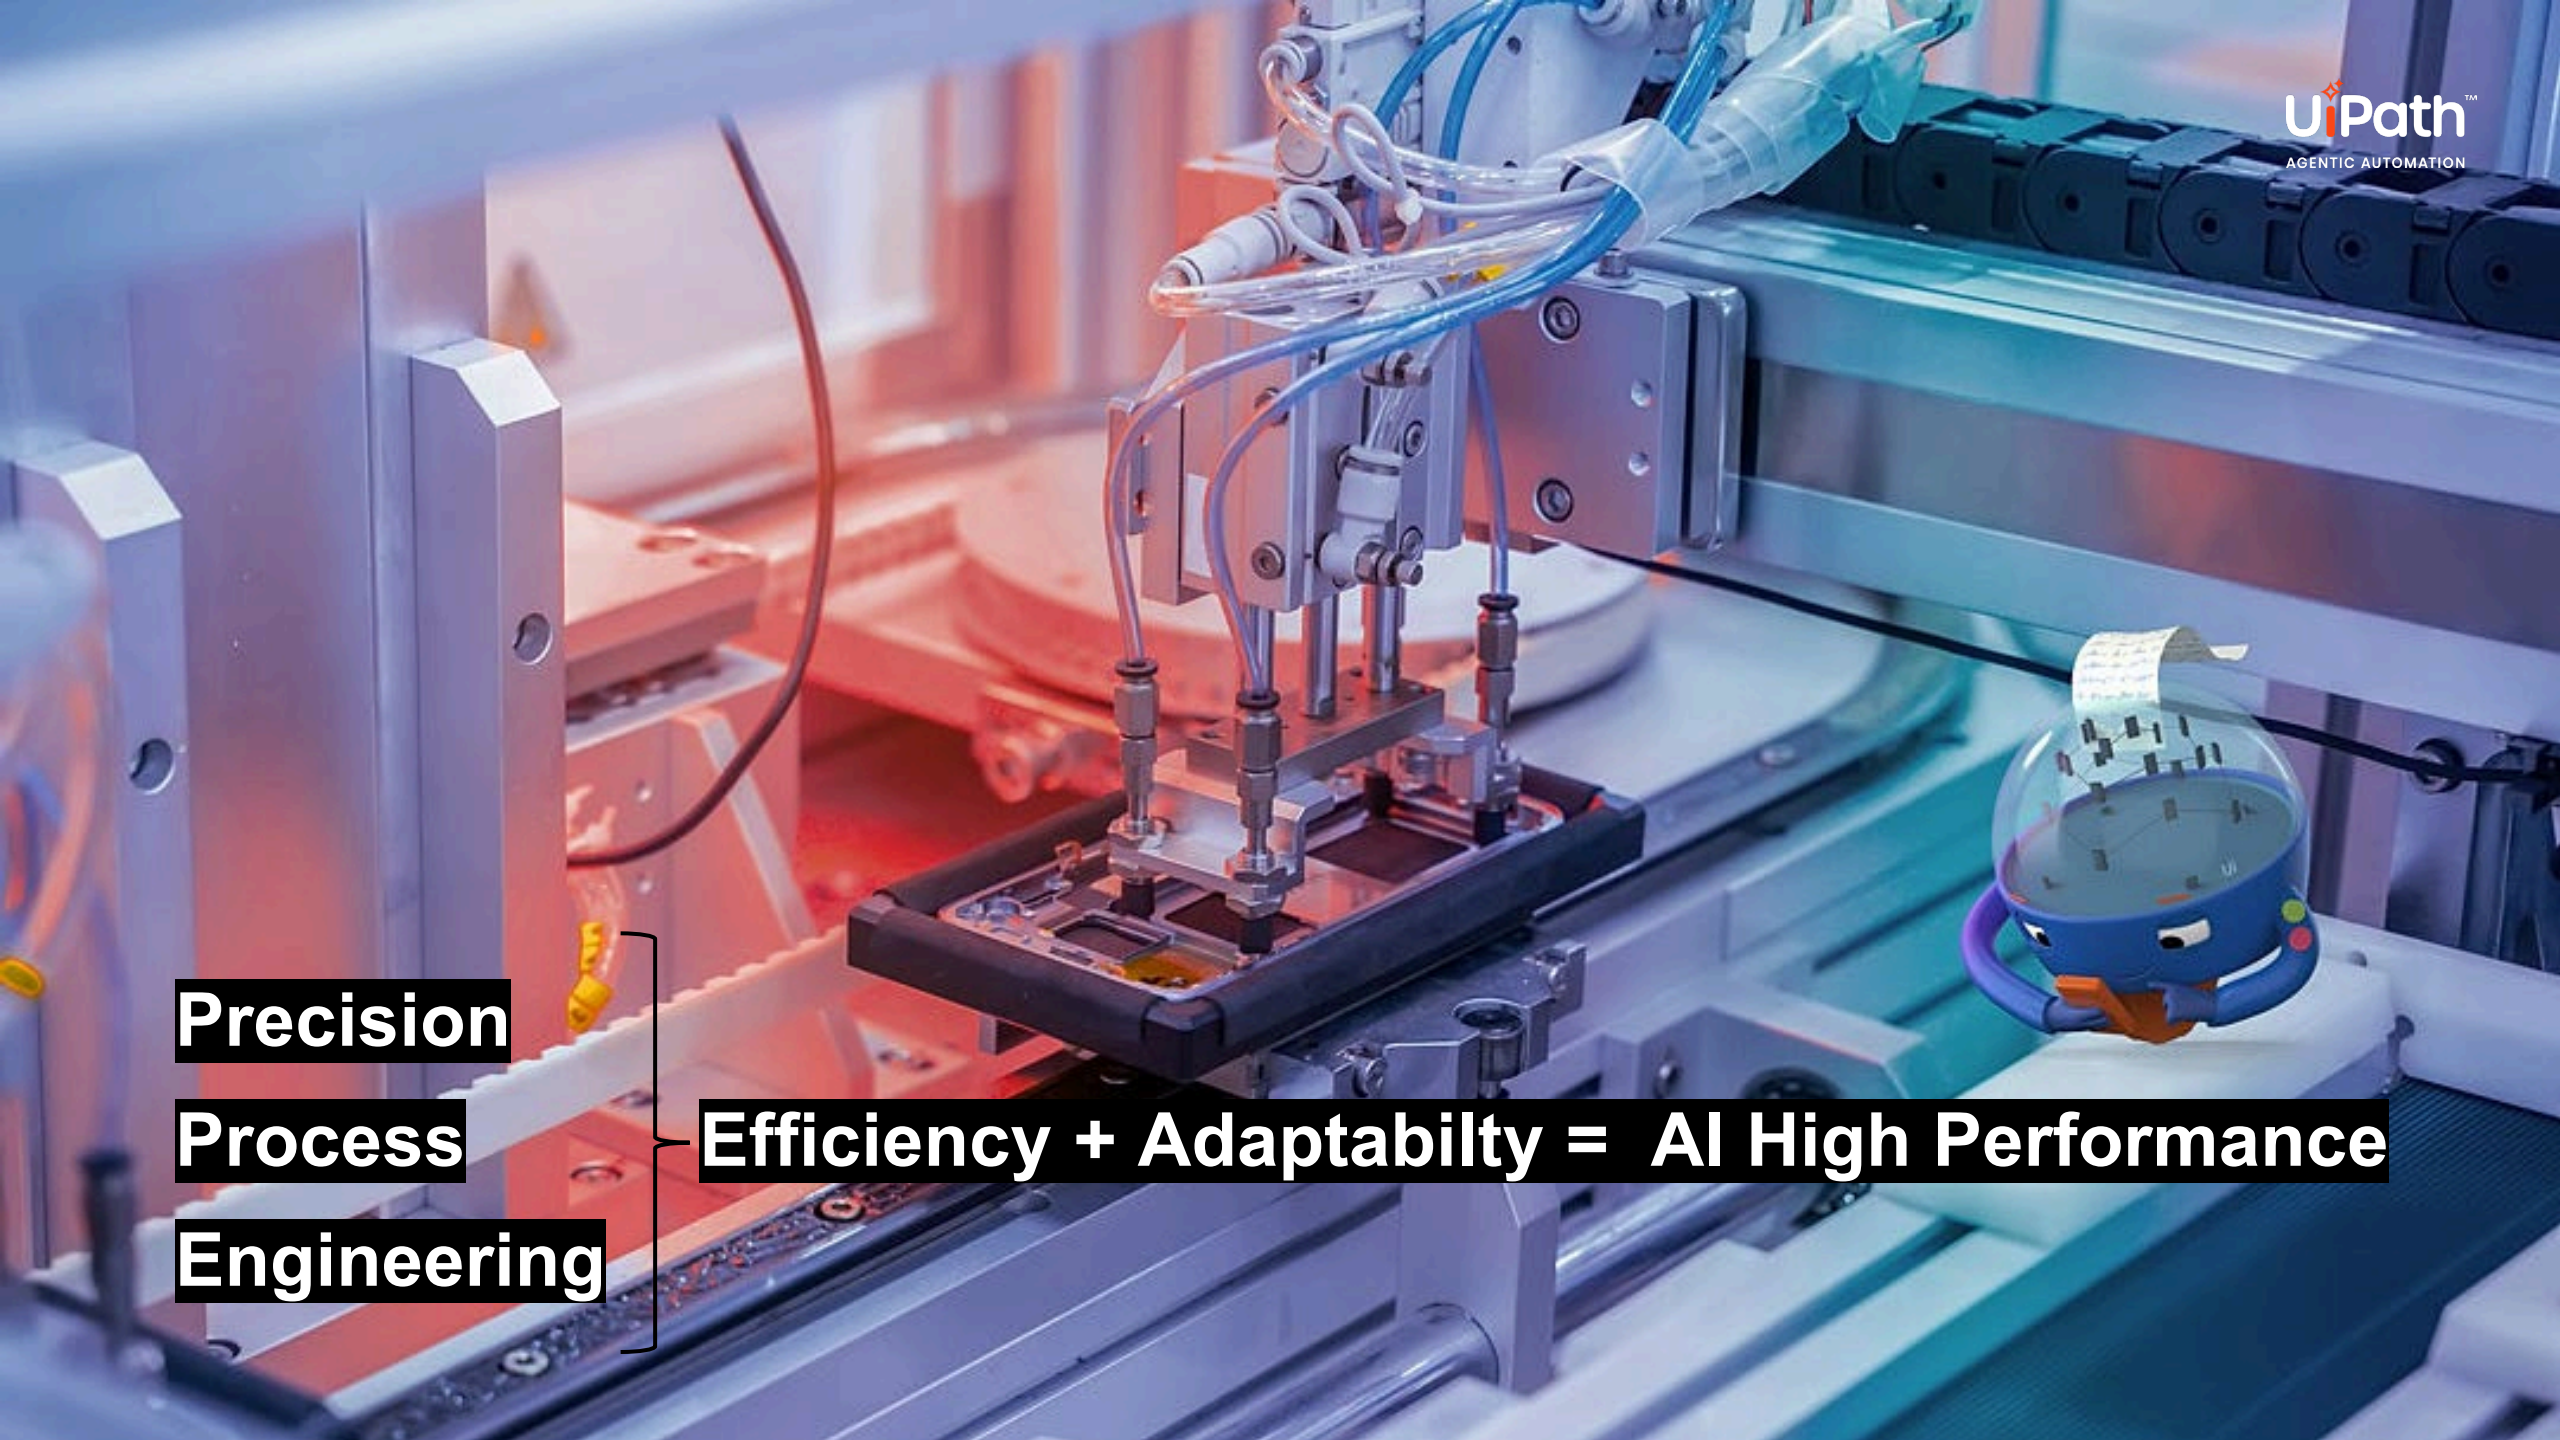

Track every step — make performance visible.

Reuse agents — don’t reinvent the wheel.

And always keep **humans in the loop.**

Orchestration = Potential >> Performance
