

4 Innovations in Healthcare Staffing

We're continuously advancing our nursing jobs app and Portal to make healthcare staffing easier and more efficient for our facility partners. Here are just four of our latest innovations.

01

Free Instant Pay

Nurses can access up to 75% of their earnings immediately after clocking out of a shift. This in-app incentive helps us recruit and retain healthcare professionals and boost shift fulfillment.

02

Uber Health Rides

Nurses can request rides to and from their shifts directly in our app. This exclusive perk helps us recruit and retain healthcare professionals and improves show rates and on-time arrivals for facilities.

03

Faster Onboarding

We enhanced our document review process to onboard nurses faster and streamlined our facility agreement form procedure so nurses can get to work quicker. As a result, we're keeping up with staffing demand like never before.

04

Better Invoice Format

We've updated our invoice format so that facilities can gain better visibility into shift details and charges. For example, you can see what nursing supervisor provided their signature at clock out.

Discover how our commitment to innovation can improve your healthcare staffing today, tomorrow, and in the future. Visit shiftmed.com/providers to book a demo.
