## PROBLEM

Little Village is a 106-bed skilled nursing and psychiatric facility in Chicago, Illinois.

When COVID-19 hit, the facility quickly became inundated with last-minute employee schedule changes in a continuously evolving environment.

The complex scenario made it extremely difficult for the facility to manage nursing shifts and maintain optimal staffing levels.

## SOLUTION

As the top nursing jobs app, ShiftMed has the fastest-growing network of credentialed CNAs, LPNs, and RNs ready to claim shifts.

Little Village uses our client Portal whenever they need to fill open shifts. Once a shift posts, it instantly goes live in the app for one of our hundreds of local pre-vetted nurses to claim.

As a result, Little Village can quickly fill shifts and maintain continuity of patient care. Our Portal also makes it easy for them to automate their staffing efforts, manage schedule changes, and keep track of shifts.

## TESTIMONIAL

"I LOVE the Portal. I've got a few [ShiftMed] nurses who regularly pick up shifts, which is awesome because they're part of our family now. It's tremendous support for us during crazy times and is much appreciated."
