CASE STUDY LITTLE VILLAGE

PROBLEM

Little Village is a skilled nursing and psychiatric facility in Chicago, Illinois.

When COVID-19 hit, the facility became inundated with last-minute employee schedule changes in a continuously evolving environment.

The scenario made it extremely difficult for the facility to manage nursing shifts and maintain optimal staffing levels.

SOLUTION

ShiftMed has a fast-growing network of credentialed CNAs, LPNs, and RNs ready to work on a per diem, short-term, long-term, or permanent basis.

Little Village uses our on-demand healthcare workforce marketplace to quickly fill shifts with local talent and maintain proper nurse-to-patient ratios.

We also make it easy for the facility to automate staffing efforts, manage schedule changes, and keep track of shifts.

"I LOVE the Portal. I've got a few [ShiftMed] nurses who regularly pick up shifts, which is awesome because they're part of our family now. It's tremendous support for us during crazy times and is much appreciated."

—Administrator at Little Village
