TESTIMONIAL

"ShiftMed gives me peace of mind. I know that we always have enough aides to provide the care our residents deserve."

—Scheduler at Garden Spring

PROBLEM

Located in Willow Grove, Pennsylvania, Garden Spring offers therapies and short-term care services that help individuals regain their independence.

Often faced with unpredictable admission surges, the center needed a flexible healthcare staffing solution that would allow them to access quality nursing care when needed.

SOLUTION

As the top nursing jobs app, ShiftMed has the fastest-growing network of credentialed CNAs, LPNs, and RNs ready to work at a moment's notice.

When Garden Spring needs additional clinical support, they turn to our client Portal to post open shifts. Once a shift posts, it instantly goes live in the app for one of our local healthcare professionals to claim.

Because of ShiftMed, Garden Spring saves on hiring costs and never has to turn away patients because of staffing concerns.
