CASE STUDY GRACE POINT PLACE

PROBLEM

Located in Oak Lawn, Illinois, Grace Point Place, an Anthem memory care community, serves residents with Alzheimer's and other dementias.

With a growing resident census, the facility needed additional CNA support to ensure each individual received quality, personalized care.

But not just any clinical support would do; Grace Point Place needed CNAs who would embrace Anthem's mission to protect, engage, and love residents.

SOLUTION

ShiftMed has a fast-growing network of credentialed CNAs, LPNs, and RNs ready to work on a per diem, short-term, or permanent basis.

Grace Point Place uses our on-demand healthcare workforce marketplace to fill shifts with local CNAs whenever they need additional clinical support.

Furthermore, the facility has taken advantage of our no buyout fee policy, adding one of our CNAs to their full-time internal staff.

"We hired Ms. H, and she is amazing. We also adore Ms. T and will request her when we have open shifts. Thank you for your continued support."
