PROBLEM

Green Meadows is a 184-bed skilled nursing center in Malvern, Pennsylvania.

To continue delivering safe, patient-centered care, the facility needed a way to address last-minute shift call outs without overworking CNA staff.

SOLUTION

As the top nursing jobs app, ShiftMed has the fastest-growing network of credentialed CNAs, LPNs, and RNs ready to claim shifts.

By posting open shifts in our client Portal, Green Meadows can quickly tap into our extensive pool of local pre-vetted healthcare professionals.

Once a shift posts, it goes live in the app and our nurses receive instant notification of its availability.

After a healthcare professional claims a shift, Green Meadows can view their credentials in the Portal and review their work hours.

With the ability to cover last-minute call outs, Green Meadows maintains optimal staffing levels, prevents staff burnout, and saves on overtime costs.

TESTIMONIAL

"The first day we worked with ShiftMed, we asked them to fill 12 shifts for the next day. I was shocked when they did it!"
