

## Green Meadows Case Study

Last-minute shift call  
outs leaving your  
nursing staff burnt out?

**SHIFTMED HAS  
YOU COVERED.**

## CASE STUDY GREEN MEADOWS

### PROBLEM

Green Meadows is a nursing center in Malvern, Pennsylvania. To continue delivering safe, quality patient care, the facility needed a way to address last-minute shift call outs without overworking its CNA staff.

### SOLUTION

ShiftMed has a fast-growing network of credentialed CNAs, LPNs, and RNs available to work on demand.

By posting open shifts in our Portal, Green Meadows can quickly tap into our extensive pool of local healthcare professionals.

Once an individual claims a shift in our nursing jobs app, the facility can easily access their credentials in the Portal.

With the ability to cover last-minute call outs, Green Meadows maintains optimal staffing levels, prevents staff burnout, and saves on overtime costs.
