Print perfect checklist

○ Add your custom artwork to **your design here layer.**

○ To ensure the texts will come out legible. We recommend using **0.8mm for the text height.**

○ Thickness of lines, strokes and gaps should be **no less than 0.2mm.**

○ For designs near the edge, please leave a **2mm space** from the edge to ensure it will not move to the other side of the bag.

○ For best results, your design should be in **vector** format, but if an image will be used, it should be no less than **300 DPI.**

○ In order to ensure your custom bakery bag prints correctly, we require that **all fonts be converted to outlines.**

○ For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above.** Do not scale the QR code below a **minimum of 16x16mm.**
