Print perfect checklist

- Add your design to the template available on the next page.

Bleed Area
Make sure to extend your background to fill the bleed area to avoid a white border. We require **4mm** of bleed all around.

Trim Line
This is a guide where the design will be trimmed.

Safe Area
Keep important text or graphic elements within the safe area which is **1.5mm** from the trim line. This is to prevent it from being cut off, or from being too close to the edge, which does not look nice.

- We recommend using **2.5mm (7pt)** font size, and on a coloured background, white text must be at least **3.2mm (9pt) high.**
- Thickness of lines, strokes and gaps should be no less than **0.75mm.**
- All colors should be converted to **CMYK.**
- For best results, your design should be in **vector** format, but if an image will be used, it should be no less than **300 DPI.**
- In order to ensure your custom coaster prints correctly, we require that **all fonts be converted to outlines.**
- For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above.** Do not scale the QR code below a **minimum of 16x16mm.**

1 Download dieline
Ensure you have downloaded the correct sized dieline. Dielines can be found on the **noissue website.**

2 Complete your design
Use the Print Perfect Checklist as a guide to get the best print results. Export as **CMYK PDF.** No crop marks needed.

3 Upload artwork and order, or share with your Account Manager
Complete your order, upload your artwork and checkout. To guarantee print satisfaction, we'll review your file and send you a final proof to approve before going to print.
