

# Splashtop Business Access

Get fast remote access with Splashtop Business. Increase productivity with smooth, secure access to all your company's applications, files and data.

## Easily access all your processor intensive desktop applications anywhere, anytime, from any device

Now all types of business professionals can enjoy a truly interactive and intuitive experience with Splashtop's superior remote application and desktop access. Use your existing applications on a mobile device without retraining or re-engineering applications. Splashtop Business is capable of delivering 3D graphics, HD video, and other apps that were previously impossible to use on tablets.

### Key features and benefits

- **High Performance** – Get [4K streaming at 40fps](#) and iMac Pro Retina 5K streaming at low latency. Reduced CPU utilization provides more headroom to process applications. Settings can be fine-tuned to get optimal performance. Optimized encoding and decoding engine takes advantage of the latest hardware acceleration from Intel, NVIDIA, AMD.
- **Secure Connections** – Get secure infrastructure, intrusion protection, SSL/AES 256 bit encryption and other [advanced security features](#).
- **Multi-monitor Support** – Remote into multiple monitors connected to your workstations.
- **Access From Any Device** – Remote into your Mac, Windows or Linux computer from any Mac, Windows, iOS, Android, or Chromebook device.
- **SSO Integration** (upgrade to [Splashtop Enterprise](#)) – Easy, secured and centralized authentication. Integrations with all [major identity providers](#).
- **Centralized Admin Console** – For large deployments, IT admins can easily deploy and manage employees' remote access to computers.
- **Increased User Productivity** – Intuitive gestures and menu interface delivers a native application experience. Customizable shortcuts allow easy access to application features. Whiteboard allows users to annotate over content. Get file transfer, remote print and other in-session features.

### Who benefits?

- Professionals who need to view or transfer files or access software applications on company computers without using VPNs.
- Business owners – To ensure company data is protected while keeping mobile employees productive.
- Field/sales reps – To access the company's internal systems or view the latest sales presentations and training materials.

### Supported environments

**"I dumped LogMeIn over a year ago for the same reason everyone talks about: cost!!! And been using Splashtop Business since then without any regrets. I fully been recommending it to my work colleagues, as a great tool to stop hauling their laptops or avoid stressing out when they are away from their home or office desktops. Easy and very dependable to use."**

— Juan C Ryan
