

MOBILITY BAROMETER AMONG EUROPEANS

SCOPE OF THE SURVEY

6
countries

6001
interviews

SAMPLE

- In each country, representative sample of the population 18+
- Quotas on gender, age, profession, region and market size.

FIELDWORK DATES

November 29th - December 9th, 2022

DATA COLLECTION

Online survey via Ipsos panels

1. MOBILITY HABITS IN EUROPE

KEY INSIGHTS

- If the vast majority of Europeans still drive a car on a regular basis (second transportation mode used after walking), almost half of them also use bicycles, electric bikes being adopted by 1 out of 5.
- Despite the development of home office since Covid, Europeans continue to commute, with commuting distances exceeding 10km for half of them.
- In a context of inflation and energy crisis, mobility represents a significant monthly budget : 133€ on average.
- Since Covid, some evolutions have been operated in mobility habits : walking, bicycles and scooters have become more popular, whereas means of transportation involving too much proximity (car-sharing, care-pooling, public transportation) have been reduced.
- Changes in mobility habits have been triggered mainly by 2 dimensions : cost, and environmental concerns. Professional reasons (including new ways of working) come after in 3rd position.
- In future intentions, the only mode that shows a positive delta is walking : all other modes of transportation, including personal cars, could be used less frequently. A general wish for less mobility?

1.1

CURRENT MOBILITY HABITS

WALKING AND USING A PERSONAL CAR ARE THE MOST WIDESPREAD MODES OF TRANSPORTATION ON WEEKDAYS, FOLLOWED BY PUBLIC TRANSPORTATION AND PERSONAL BICYCLES

MODES OF TRANSPORTATION USED ON WEEKDAYS

2.

VEHICLES OWNERSHIP AND INTENTIONS

KEY INSIGHTS

- Personal cars remain widespread in Europe : almost 9 out of 10 Europeans own a car in their household. Company cars, on the other hand, only concern less than 10% of them.
- The majority of main cars are ICE (Petrol slightly ahead of diesel in Europe), whereas other powertrains remain confidential, except for hybrid representing 5% of main cars.
- In terms of financing methods, purchase prevails. Leasing represents a small part of car acquisition (7% in Europe), more frequent in France. Cars are most often acquired through manufacturer's dealerships, or independent garages.
- Maintenance & repairs at garages or workshops are done quite frequently by one third of car owners, the rest of them usually going only once a year.
- Services such as replacement car during repairs, garage certification and car quality guarantee could drive preference if offered by specific garages.
- Electric Vehicles show a significant potential, with almost one third of Europeans intending to buy one. However, cost represents the first barrier to EV purchase, ahead of charging points issues and long-distance trips difficulties.

PERSONAL CAR OWNERSHIP STAYS WIDESPREAD IN EUROPE.

3. MICRO MOBILITY

KEY INSIGHTS

- Bicycles have conquered Europeans : almost 2 out of 3 own at least one bike on their household, and 1 out 5 electric bikes. E-bikes are more widespread in Belgium and Germany than in other countries for now.
- Stand scooters keep installing themselves, with 17% of owners on average, split quite evenly between standard & electric scooters.
- Shared services, whether for bikes or stand scooters, are used by 1 out 5 micro-mobility users overall.
- A use that has been intensified since Covid : about one third of micro-mobility / bike users started using them regularly during or since the Covid crisis.
- Safety and coverage when riding bicycles and scooters is still heterogeneous : if two thirds of users usually wear helmets on bike/scooters, one third doesn't wear any protection, and only one third of users are sure to be covered by their insurance while using those vehicles, the other 2 thirds not sure or not covered
- Overall, more than 4 out of 10 Europeans could be interested by a person-based insurance when it comes to mobility.

ABOUT TWO THIRDS OF RESPONDENTS OWN AT LEAST ONE BIKE, MAINLY A STANDARD ONE. ELECTRIC BIKES ARE MUCH MORE COMMON ALREADY IN BELGIUM AND GERMANY.

MOTORBIKES / BICYCLES OWNED - AT LEAST ONE %

AMONG MICRO-MOBILITY USERS IN GENERAL, A REGULAR USE OF BICYCLES, WHILE SHARED SERVICES AND STAND SCOOTERS ARE EMERGING.

VEHICLES USAGE IN THE PAST 6 MONTHS %

MICRO-MOBILITY VEHICLES AND BICYCLES USED HAS BEEN INTENSIFIED SINCE COVID AND LOCKDOWNS : ABOUT ONE THIRD OF “NEW REGULAR USERS”.

START USING MICRO MOBILITY - %

EUROPE

Since the end of the lockdowns after Covid-19 first wave- During the Covid-19 crisis- Before the Covid-19 crisis

ALMOST TWO THIRDS OF USERS WEAR A HELMET WHEN DRIVING MICRO-MOBILITY VEHICLES OR BICYCLES. SPAIN'S AND PORTUGAL HIGHER USE COULD MAYBE BE LINKED TO LEGISLATION.

DRIVING HABITS – WEARING A HELMET - %

ONLY 3 OUT OF 10 USERS ASSERT THEY HAVE FULL COVERAGE FOR THEIR BICYCLE OR SCOOTER.

MICRO MOBILITY COVERAGE

EUROPE

BIKE OWNERS MAINLY MAINTAIN AND REPAIR THEIR BICYCLES BY THEMSELVES, ESPECIALLY IN FRANCE.

4. CAR INSURANCE & ASSOCIATED SERVICES

KEY INSIGHTS

- Choice criteria for a car insurance are primarily driven by price. Trust in insurance company comes far behind in second position.
- Services considered the most important when acquiring a car are the same as when choosing an insurance company :
 - Roadside assistance
 - Replacement car
 - Mobility services for driver and passengers in case of immobilization
 - Stolen vehicle tracking
- Person-based mobility assistance and pick-up & drop-off are the most differentiating services when selecting an insurance company

IMPORTANT DIFFERENCES IN INSURANCE BUDGET BETWEEN COUNTRIES. OVERALL, WHEN RESPONDENTS ANSWER MONTHLY, IT TENDS TO BE TWICE AS HIGH AS THE YEARLY EQUIVALENT.

6. ATTITUDES

KEY INSIGHTS

- Half of employed Europeans would be interested by a mobility budget provided by their company.
- Even if Europeans are aware that environment needs to be a priority and efforts be done to change habits, evolutions at a personal level depend on individual perceptions : only a small proportion really feel bad about using cars, the impact of EV vs thermic vehicles on environment is not obvious...
- ...and changes in mobility habits have also been caused by other factors than environment, such as Covid or inflation.

HALF OF WORKERS WOULD BE INTERESTED BY A MOBILITY BUDGET

INTEREST FOR ALTERNATIVE MOBILITY SOLUTIONS (WORKERS)

Very interested – Rather interested – Rather not interested – Not interested at all

© Ipsos

Q55 – Would you be interested by a mobility budget that would be provided by your company?
 A mobility budget is a digital wallet and platform to access multiple mobility and transportation means (including car sharing, micro-mobility, public transportation, taxi & ride-hailing...)
 Base : Workers

GAME CHANGERS

In our world of rapid change, the need of reliable information to make confident decisions has never been greater.

At Ipsos we believe our clients need more than a data supplier, they need a partner who can produce accurate and relevant information and turn it into actionable truth.

This is why our passionately curious experts not only provide the most precise measurement, but shape it to provide True Understanding of Society, Markets and People.

To do this we use the best of science, technology and know-how and apply the principles of security, simplicity, speed and substance to everything we do.

So that our clients can act faster, smarter and bolder. Ultimately, success comes down to a simple truth:
You act better when you are sure.
