

Convenient Account for Emergency Savings

Cash Management Account

The unexpected will eventually happen. Having an emergency fund helps ensure you have cash on hand when you really need it, so you don't have to resort to credit cards or loans. Consider setting aside the equivalent of at least three to six months of living expenses, keeping it in a separate account to avoid temptation, and replenishing anything you use.

What to consider

The Fidelity® Cash Management Account is a convenient way to save and manage cash. This brokerage account has many of the same features as a checking or savings account. For easy tracking, your account appears on the homepage of NetBenefits® with your other Fidelity accounts.

Where to get more information

fidelity.com/emergencysavings

Key features

A digital solution for saving for short-term goals

- No monthly account fees, no minimum account balances
- Free mobile check deposit
- Free checkwriting and Fidelity BillPay®

How it works (Access Goal Booster via NetBenefits® to get started)

1. Get started

Open your Fidelity Cash Management Account in just a few steps.

2. Build up your account

You can use direct deposit, mobile check deposit, or electronic funds transfer.

3. Access your cash

Easily tap into your account to cover unexpected situations, bills, and expenses.

Keep in mind that investing involves risk.
