CYGNA AUDITOR FOR AZURE

Complete visibility into what's happening in Microsoft Azure

Azure is Microsoft's cloud computing platform that provides a wide range of services that organizations use to build, test, deploy and manage hosted applications and services. These services are available through Microsoft managed data centers around the globe. Whether an organization has gone through digital transformation or has created born in the cloud applications, the security and operations are managed in Azure. Keeping track of what is going on in Azure is paramount to reduce the risk of costly downtime or even unwanted access.

Comprehensive change auditing

Cygna Auditor for Azure captures the details of changes made to your subscriptions, tenants and resources, including who made the change, when the change was made, and what changed with the pre and post values. This provides you the ability to act immediately to minimize the security impact or unwanted activity.

Track role changes

Monitoring changes to Azure role definitions and role membership is critical to ensure security and mange access to your organizations Azure resources. Cygna Auditor for Azure also reports on changes to management groups and policies that are applied for governance and subscription controls.

Detailed logon tracking and risky sign-ins

Monitor Azure AD for compliance and security by analyzing user and admin sign-ins. Security reports on both successful and failed attempts to access your cloud applications and services. Cygna Auditor for Azure AD also reports back on sign-in attempts from risky or anonymous IP addresses.

Customer quote:

Financial Services: "We did a lift and shift of our customer facing apps to Azure, so security and uptime is critical to keep our customers' confidence. Cygna Auditor alerts us on key changes so we can act immediately to maintain security, compliance, and operations for our Azure apps."
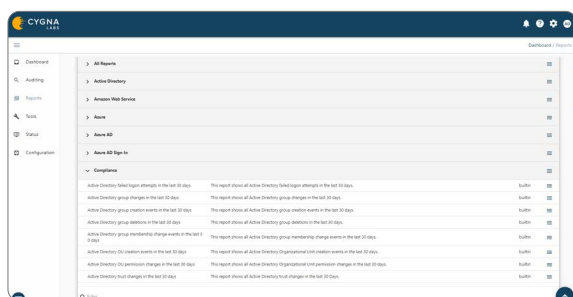

CYGNA LABS

Plain language events

Cygna Auditor provides concise events in plain language making it easier to understand for all users.
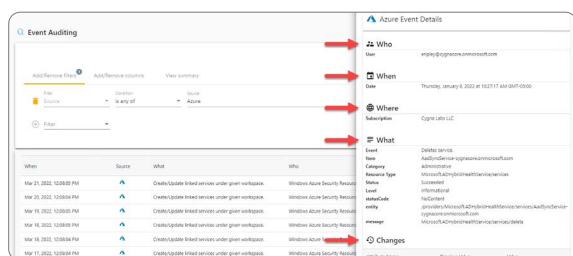

Reporting

Generate comprehensive reports with built-in or custom reports for best practices and regulatory compliance mandates such as GDPR, SOX, PCI-DSS, HIPAA, FISMA, GLBA and more.

Real-time alerts

Get notified in real-time of critical changes that may require immediate attention. Alerts can be sent to email, event log, Teams and or to SIEM systems.

Centralized web-based management console

Search from anywhere using a web browser, no need for an installed console. Query and report across on prem, hybrid and multi-cloud environments with a simple to use interface.
