**CYGNA SECURITY AND COMPLIANCE PLATFORM**

Strengthen **Security.** Simplify **Compliance.**

Unmonitored changes to Microsoft Hybrid Identity objects and key infrastructure systems can result in system-wide vulnerability, compromise your security posture, and introduce costly service disruptions and downtime. Data breaches and non-compliance with SOX, PCI, HIPAA, GDPR or other regulations can cause you to incur significant expenses. Cygna Security and Compliance Platform ensures you are notified of critical changes across your infrastructure while maintaining full visibility and control over your data within your environment.

SOX   HIPAA   PCI   GDPR   CCPA

Integrated Entitlement, Audit, and Recovery for Microsoft Hybrid Identity

Cygna Labs Security and Compliance Platform is the only solution with entitlements, change auditing, and recovery capabilities for Microsoft Hybrid Identity solutions. Keep your organization's key identity and infrastructure systems secure, operational, and in compliance with end-to-end coverage from hardening to recovery.

HARDEN AND VERIFY
ENTITLEMENT
AUDIT
DETECT & PROTECT
RECOVERY
ROLLBACK & REMEDIATE
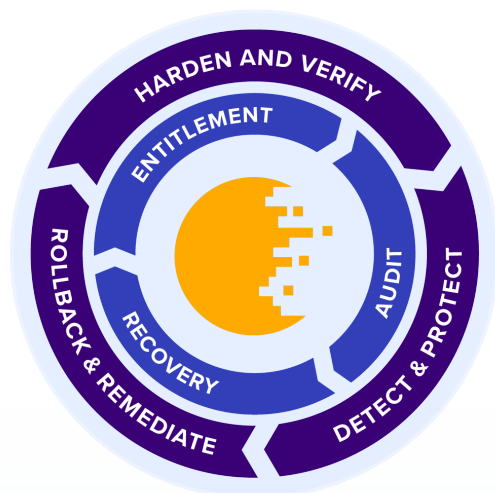

Harden and Verify

Verify appropriate permissions to protect identities and avoid costly disruptions and data breaches. Search and report on permission data to verify Principle of Least Privilege and ensure hardened configuration stays that way.

Detect and Protect

Proactively mitigate threats by monitoring and blocking suspicious changes across hybrid and multi-cloud environments. Maintain visibility and streamline management with support for 14+ audit sources, built-in compliance reporting, and a centralized, web-based console.

Rollback and Recover

Capture every change in real-time and instantly roll back any unwanted change from its source. Recover without interruption and limit blind spots end-to-end with an integrated platform for all of your security and compliance needs.

Entra ID   Active Directory   Azure   Amazon Web Services   Office 365   VMware vSphere

Cygna Security and Compliance **Platform Overview**

Cygna Entitlement and Security

Strengthens Microsoft hybrid identity security by continuously validating access, minimizing the attack surface, and generating comprehensive reports on policy compliance.

Identify high-risk permissions and settings and ensure alignment with principle of least privilege (PoLP) to enhance overall security.

Access Enforcement
Verify the principle of least privilege (PoLP) and separation of duties.

Permission Visibility
Display all permissions, including those assigned outside of onboarding or IAM / IAG solutions.

Exposure Management
Mitigate high-risk permissions and potential exposure indicators.

Cygna Auditor

is a powerful, all-in-one solution designed to simplify auditing, alerting, and reporting for your organization's critical infrastructure.

Protect your organization against data breaches and ensure compliance with key regulations, including SOX, PCI, HIPAA, GDPR, and more.

Comprehensive Change Auditing
Capture, report, and take direct action on any change to your identity and infrastructure systems across 14+ sources including Active Directory, EntraID, Microsoft 365, VMWare, and AWS.

Streamlined Compliance Reporting
Save time and maintain compliance with specialized out-of-the-box reports and templates for GDPR, HIPAA, SOX, and PCI DSS.

Simple and Flexible Deployment
Get up and running quickly across on-prem, hybrid, and multi-cloud environments. Manage everything in one place from an easy-to-use, centralized web console.
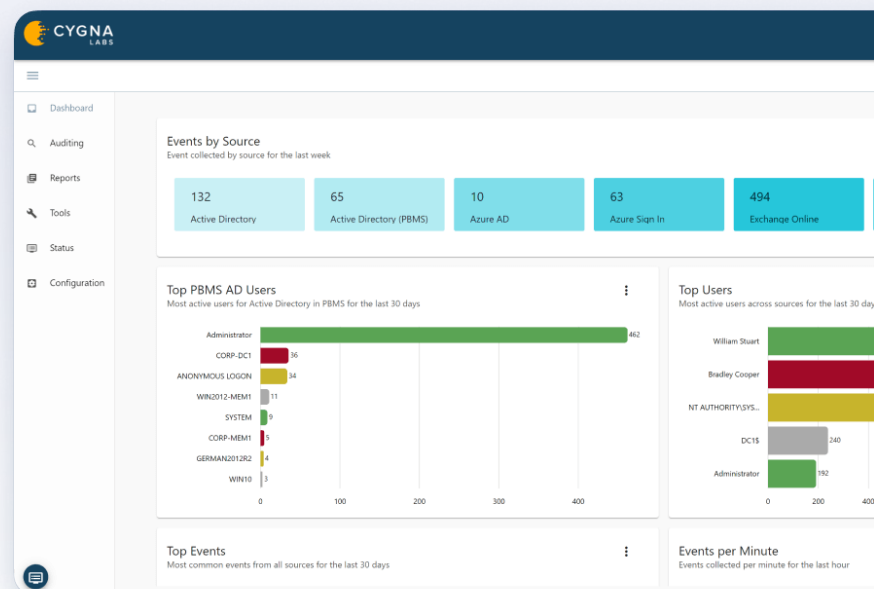

Cygna Recovery

delivers continuous data protection to safeguard your business from costly disruptions. Integrated audit and recovery help you instantly roll back unwanted changes, reducing recovery time.

Reduce time to recovery and eliminate tedious, manual backups with Cygna Recovery solutions.

Instantly Recover Objects
Quickly recover critical objects from accidental deletion, including users, groups, roles, Conditional Access Policies, OUs, and GPOs.

Rollback Changes From Audit Events
Roll back objects or attribute values in just a few simple clicks, directly from the audit event.

About Cygna Labs
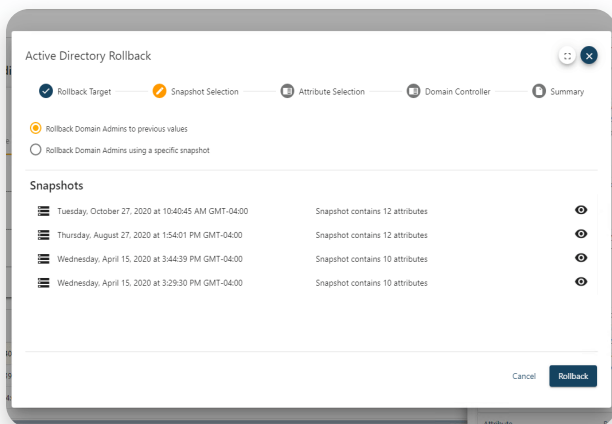

Cygna Labs is a software developer and one of the top three global DDI vendors. Many Fortune 100 customers rely on Cygna Labs' DDI products and services, in addition to its industry-leading security and compliance solutions to detect and proactively mitigate data security threats, affordably pass compliance audits, and increase the productivity of their IT departments.
