

CYGNA AUDITOR FOR EXCHANGE ON-PREMISES

Complete visibility into what's happening in Exchange On-Premises

Microsoft Exchange provides services for messaging, tasks, contacts, and calendaring for many organizations. Cygna Auditor for Exchange On-premises captures configuration and mailbox activity. Exchange is a key productivity tool that needs to be monitored for security policy, compliance violations and potential costly downtime. Cygna Auditor for Exchange is available for hybrid implementations with Exchange Online (M365) to track all these activities helping you to ensure the security, compliance, and control of your hybrid messaging environment.

Comprehensive change auditing

Cygna Auditor captures changes and activities and with the who, what, when and where details with pre and post values. This provides you the information to act immediately to minimize the security impact or system availability.

Track key events

Cygna Auditor for Exchange On-premises detects modifications to your critical email infrastructure such as configuration, permission, rule and policy changes and activities like mailbox logins/access, non-owner mailbox access.

Role-based access control with scoping

Simple access permission configuration with reader, contributor, and owner roles for every source. This allows users to only have the necessary rights to perform their jobs. Scoping ensures they can only work with the data they are allowed to see.

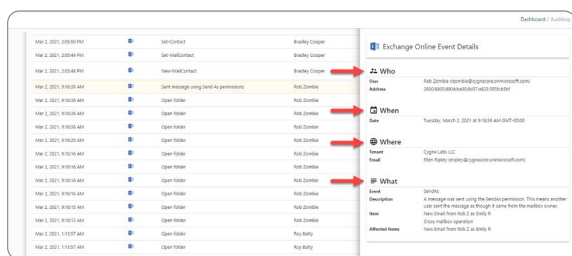

Customer quote:

Consulting firm: "We moved most of our users to M365 but needed to maintain some Exchange servers in our datacenter for our executive and other critical mailboxes. Cygna Auditor makes it seamless for us to audit, report, and alert on both environments in one product."

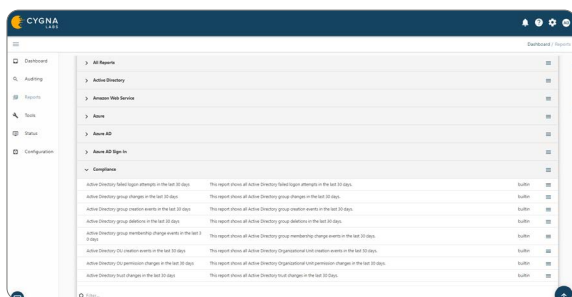

Plain language events

Cynga Auditor provides concise events in plain language making it easier to understand for all users.

Reporting

Generate comprehensive reports with built-in or custom reports for best practices and regulatory compliance mandates such as GDPR, SOX, PCI-DSS, HIPAA, FISMA, GLBA and more.

Real-time alerts

Get notified in real-time of critical changes that may require immediate attention. Alerts can be sent to email, event log, Teams and or to SIEM systems.

Centralized web-based management console

Search from anywhere using a web browser, no need for an installed console. Query and report across on prem, hybrid and multi-cloud environments with a simple to use interface.
