CYGNA AUDITOR FOR MICROSOFT 365

Complete visibility into what's happening in Microsoft 365

Microsoft 365 is a key productivity, collaboration, communication cloud solution for many organizations. Cygna Auditor captures activity in Teams, SharePoint Online, OneDrive for Business, and Exchange Online. These solutions are often used to collaborate internally and with customers, partners, and other external users to your organization. You'll need to know exactly what is happening and what is being shared and accessed for compliance and security of your sensitive content. Cygna Auditor provides deep insight into configuration, security, and content changes. It also tracks and reports on changes to Exchange Online and cross mailbox operations (non-owner) mailbox access. You need an audit solution that ensures you are notified in real time of critical changes and activities. Leverage Cygna Auditor to maintain security and prove compliance.

Comprehensive change auditing

Cygna Auditor detects changes in all Microsoft 365 with the who, what, when and where details with pre and post values. This provides you the information to act immediately to minimize the security impact or unwanted activity.

Deployment & scalability

Cygna Auditor provides the ability to manage and deploy from a centralized web management console with flexible storage. It has been built from the ground up to excel from small to exceptionally large environments.

Role-based access control with scoping

Simple access permission configuration with reader, contributor, and owner roles for every source. This allows users to only have the necessary rights to perform their jobs. Scoping ensures they can only work with the data they are allowed to see.

Customer quote:

Government organization: "Cygna made us aware of what was being shared outside the organization. Before Cygna Auditor, we had no idea to the extent this was happening. Now we have accountability, increased security, and protection for our sensitive data."
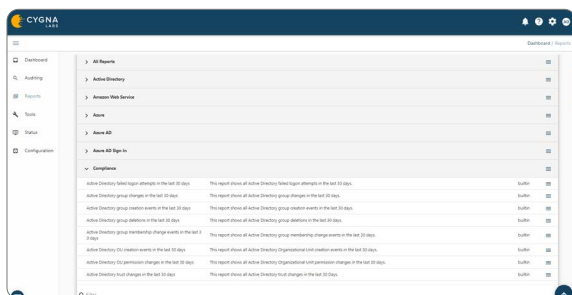

CYGNA LABS

Plain language events

Cygna Auditor provides concise events in plain language making it easier to understand for all users.
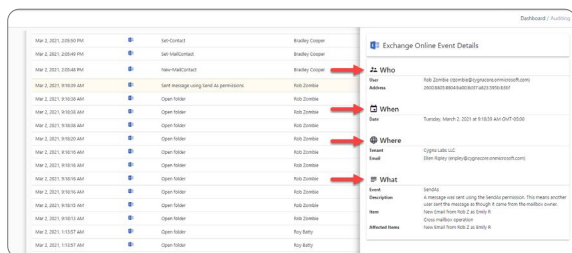

Reporting

Generate comprehensive reports with built-in or custom reports for best practices and regulatory compliance mandates such as GDPR, SOX, PCI-DSS, HIPAA, FISMA, GLBA and more.

Real-time alerts

Get notified in real-time of critical changes that may require immediate attention. Alerts can be sent to email, event log, Teams and or to SIEM systems.

Centralized web-based management console

Search from anywhere using a web browser, no need for an installed console. Query and report across on prem, hybrid and multi-cloud environments with a simple to use interface.
