

RUSAL

- RUSAL is a leading global aluminium producer accounting for 7% of global aluminium production in 2015. RUSAL's assets and representative offices are located in 20 countries, across 5 continents.
- There is a high degree of vertical integration within RUSAL's upstream business, which ensures the longevity of raw material supply. RUSAL's core smelters are located in Siberia and they benefit from access to clean hydro generated electricity.
- RUSAL's key sales markets are Europe, Russia and CIS countries, North America and Asian countries. The Company's major end consumers include over 700 companies in the transport, construction and packaging industries.
- RUSAL monitors market demand closely, and adapts its product portfolio in order to meet consumers' changing needs. RUSAL has a particular focus on VAP production, which accounts for approximately half of total metal produced.
- A major competitive advantage of RUSAL is its in-house R&D, engineering and design resources, which enables the Company to develop cutting-edge technologies, state-of-the-art equipment and technically advanced facilities.
