Heckington Fen Solar Park

April 2023

Hello,

Further to our correspondence last year, I'm writing to update you about the Heckington Fen Solar Park, which has now been accepted for examination by the Planning Inspectorate. The project comprises solar panels, energy storage and a grid connection to Bicker Fen National Grid Substation.

An Environmental Statement accompanies the application, which can be found on the Planning Inspectorate's website, along with plans, a non-technical summary and the application form: <https://infrastructure.planninginspectorate.gov.uk/projects/east-midlands/heckington-fen-solar-park/>. Upon request, the non-technical summary or a USB memory stick of all of the planning documents can be provided free of charge. Other formats of the application documents can be made available but would be subject to a fee due to the number involved. Please contact us on the details below if you would like to request a copy.

If you wish to make a comment, you can request to be an Interested Party with the Planning Inspectorate online: <https://infrastructure.planninginspectorate.gov.uk/projects/east-midlands/heckington-fen-solar-park/>

Representations will be public, however if you wish to remain anonymous please state this in the representation and please review the privacy notice here: <https://www.gov.uk/government/publications/planning-inspectorate-privacy-notice/customer-privacy-notice>

If you require any support to register your interest and provide representations please contact the Planning Inspectorate on 0303 444 5000 or HeckingtonFenSolar@planninginspectorate.gov.uk, or Ecotricity on the details below. Please note that representations must be received by the Planning Inspectorate by 11:59pm on 9 June 2023.

Thank you for reading,

Laura, Project Manager
