

FOOTWEAR SIZE GUIDE

1. Print the size guide at 100% scale.
Confirm scale using a credit card.

2. Fold or cut the paper so it's flush with a wall. Align your child's heel with the wall, placing their bare foot on the size guide (one foot at a time).
3. Find their size by locating the number line closest to their longest toe. Different sized feet? Size for the larger of the two. If they are between sizes, size up.

SIZE

Fold or cut along the dotted line to align heel with the wall.
