### Unmanned Aerial Vehicles

#### Drones

\$28.2 billion market (2022)<sup>9</sup>

380 million Connected Cars on the road (2021)<sup>6</sup>

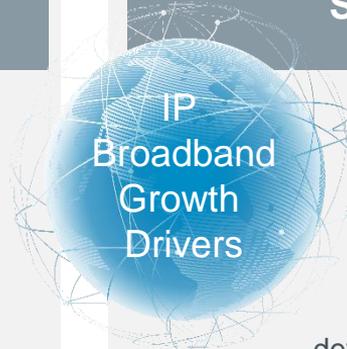

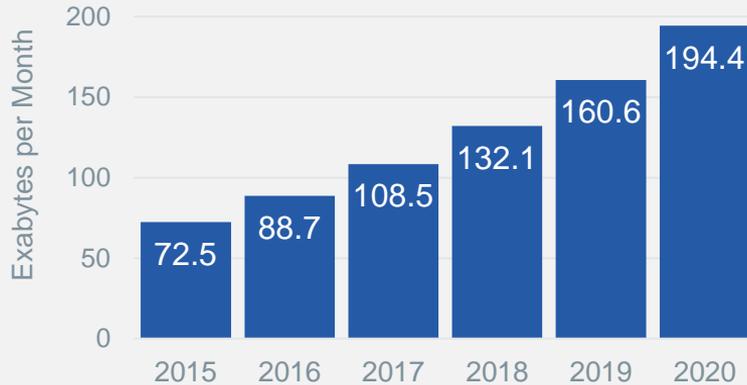

# Dominant Market Trends

## Relentless Traffic Growth

### Global IP Traffic

**3x increase 2015 - 2020**

**CAGR 22%**

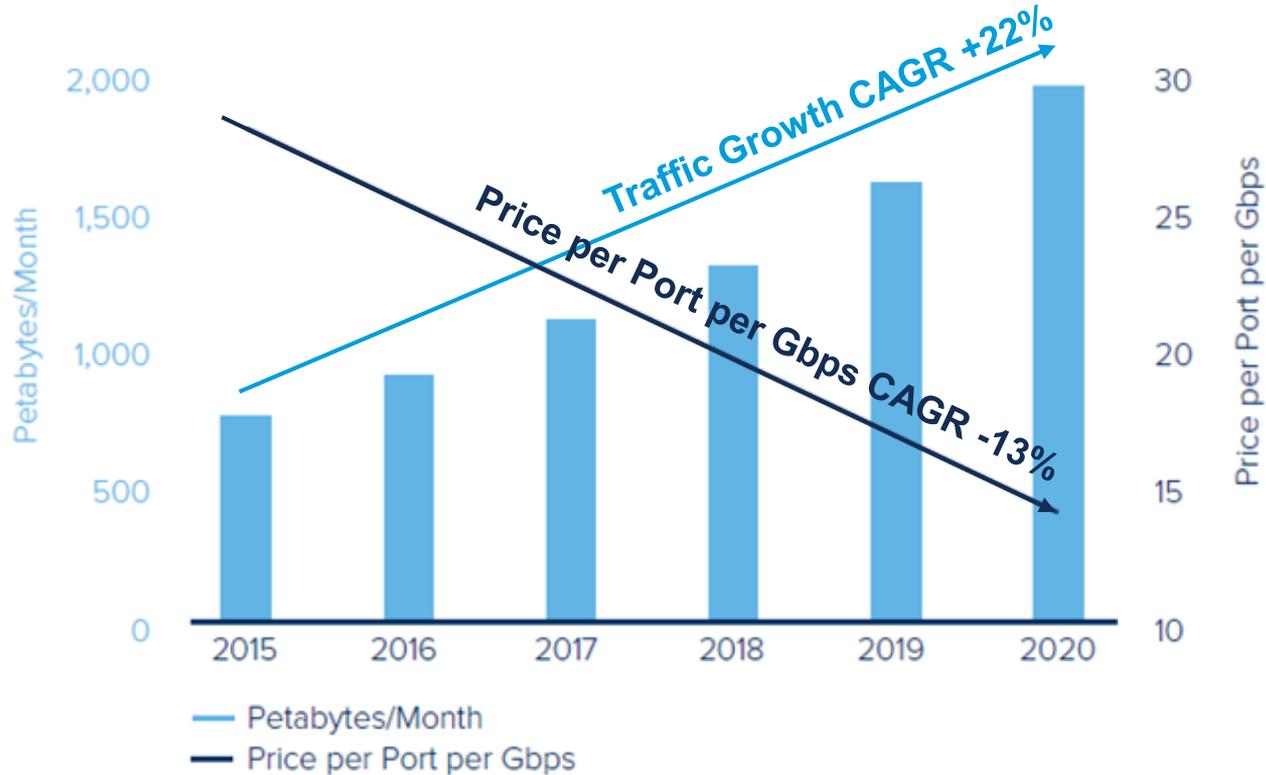

### Service Adoption Drivers

|                              | 2015           | 2020           |
|------------------------------|----------------|----------------|
| More internet users          | 3.0 billion    | 4.1 billion    |
| More devices and connections | 16.3 billion   | 26.3 billion   |
| Faster broadband speeds      | 24.7 Mbps      | 47.4 Mbps      |
| More video viewing           | 70% of traffic | 82% of traffic |

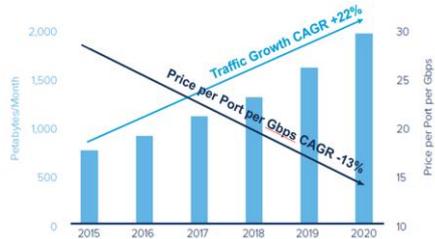

Source: Cisco VNI Global IP Traffic Forecast 2015-2020 (June 7, 2016)

# Dominant Market Trends

Business imperative to reduce operating costs and capital expenditures

Source: IHS. Market Insights “RESEARCH NOTE. Telecom Capex Languishes in Flatland” (November 21, 2016)

## Market Challenges

- Relentless traffic growth (video)
- Business imperative to radically reduce expenses

## Market Disruptions

Cybersecurity

Virtualization

Internet of Things

5G

## Vision

Experts in methodologies and solutions for the development and management of communication networks, connected devices and applications

## Strategy

- Innovate easy-to-use test products & services
- Provide specialized and consultative sales & support

## Strategic Objectives

- Lead in high-speed Ethernet/IP and positioning
- Accelerate growth in cybersecurity and network virtualization
- Grow lifecycle service assurance business
- Explore new areas for future growth: 5G, autonomous vehicles
- Expand in large enterprise customers

A panoramic view of the Shanghai skyline at night, featuring the Oriental Pearl Tower, the Shanghai Tower, and the Shanghai World Financial Center, all illuminated against a dark blue sky. The buildings are reflected in the water of the Bund.

## Business Focus

James Armstrong  
Chief Operating Officer & EVP, Products

# The Smarter Future – Our Focus

Develop

Operate

Connected Devices

Networks & Security

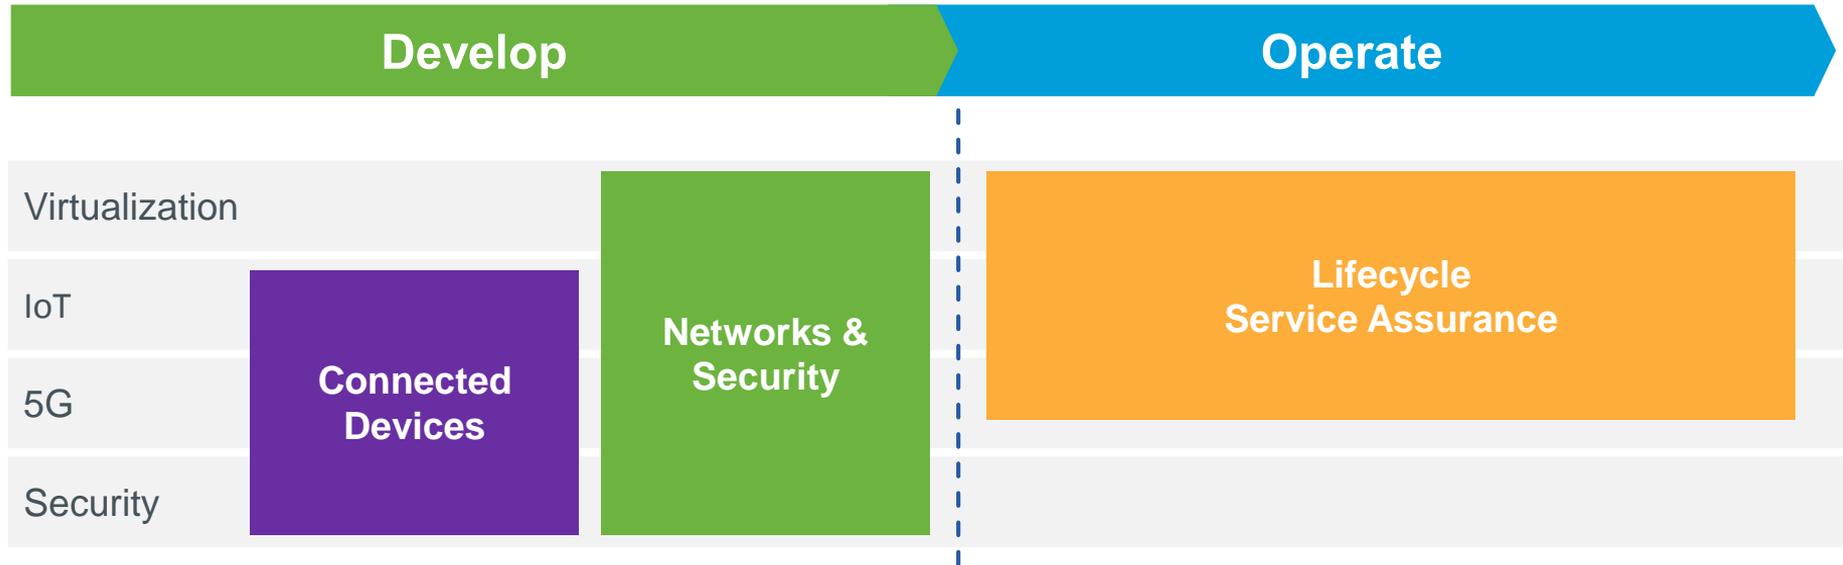

Lifecycle  
Service Assurance

*Connecting a smarter future .... Connect. Perform. Secure.*

# Re-segmenting for Focus - Rationale

- **Accelerate Product Development.** Group business units that collaborate on developments or leverage expertise and technology to develop new products and services.
- **Streamline Go To Market.** Business units in the same segment target similar customers, job function and phase of the technology lifecycle.
- **Cost Savings.** Rationalise organisational structure.

# Organised for Sharp Focus on Target Market Opportunities

## Networks & Security

**Driven by  
virtualization and security**

Automated performance and security test systems to accelerate development & deployment of networks and applications.

## Lifecycle Service Assurance

**Driven by  
virtualization, mobile networks  
and the Internet of Things**

Active test and analytics solutions for service turn-up, network performance improvement & customer experience management.

## Connected Devices

**Driven by  
the Internet of Things and 5G**

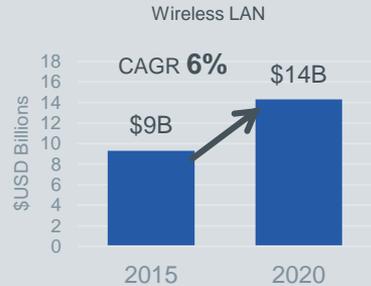

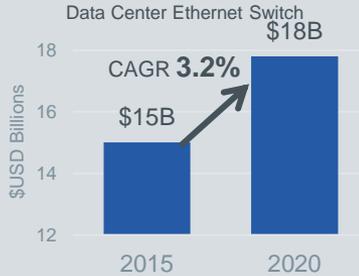

Automated test systems to accelerate the development & deployment of connected devices.

# Managing an Effective Cost Base

| \$ million                              | 2016         | 2015         |
|---|--------------|--------------|
| Product development                     | 111.7        | 118.3        |
| Selling and distribution                | 125.4        | 127.2        |
| Administration                          | 40.7         | 44.2         |
| <b>Total overhead costs<sup>1</sup></b> | <b>277.8</b> | <b>289.7</b> |

- Deploy external benchmarking
- Sales reorganisation underway, complete during 2017
- Focus on driving effectivity... more for less

(1) Before exceptional and other items

# Investing for Sustainable Earnings

- Sales reorganisation underway
- New customer approach evolving
- Developing key account management
- Engaging with key customer - insights
- Further developing ROI metrics
- Synergies from new organisation

# How We Decide Where to Invest

Invest in areas where the following criteria are met... to drive improving margins

Returns will be delivered by:

- Focused strategy
- Plans built on market growth drivers and disruption
- Maintaining leading technology
- Transition to more software sales will drive improved margins
- Being efficient - cost management focus: sales re-organisation, combining of business units
- Strong cash conversion

## Driving Growth

- Strong demand for Ethernet testing
  - Leading edge technology
- Recent investments driving new product launches
  - High-speed Ethernet portfolio additions
  - Application Security – Cyberflood, SecurityLabs
  - Positioning – multi constellation simulators, new interference detectors
  - VisionWorks assurance products and services

### Networks & Security

|                               |        |
|-------------------------------|--------|
| Market growth                 | 10%    |
| Revenue                       | \$262M |
| Gross margin                  | 71%    |
| Operating margin <sup>1</sup> | 18%    |

### Lifecycle Service Assurance

|                               |       |
|-------------------------------|-------|
| Market growth                 | 7%    |
| Revenue                       | \$99M |
| Gross margin                  | 78%   |
| Operating margin <sup>1</sup> | 11%   |

## Managing Technology Change

- Legacy to growth
  - Device testing decline
  - New 5G channel emulator investment

### Connected Devices

|                               |       |
|-------------------------------|-------|
| Market decline                | (3)%  |
| Revenue                       | \$97M |
| Gross margin                  | 64%   |
| Operating margin <sup>1</sup> | (5)%  |

(1) Before exceptional and other items

# Actions are clear

Analytics

# Combining Products to Win in the Virtual Era

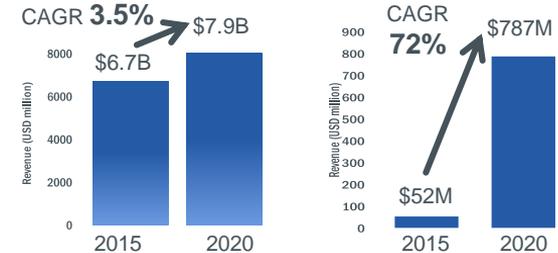

To create a platform uniquely positioned for the high-growth **production NFV assurance** market

We're combining lab & production solutions

- Rapid On-Boarding
- Reduced OPEX & CAPEX
- Differentiated Experience

## Service Assurance systems worldwide | Service Assurance for NFV/SDN

Source: Analysys Mason (Jan 2016)

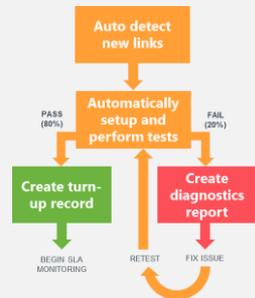

# Case Study: Large Improvements in Speed and Cost

## The Challenge

- Roll out 50k+ small cells
- Use existing team to activate
- Activate >100 small cells / day
- **Legacy process: <10 cells / day**

## Spirent's Solution

- Automate activation workflow
- Back-office system integration
- Integrated backhaul testing
- Auto-detect & test new links

## Benefits Achieved

Reduced small cell operational deployment costs by millions

- *No additional staff*
- *Vendor agnostic improves efficiency*
- *Reduces manual testing by 95%*

Onboarded services faster, accelerating time to revenue

- *Activate >1,000 small cells per week due to automated process*
- *More than 10x faster time to revenue vs. traditional process*

Deployed network faster, improving service experience

- *Small cells provide coverage in critical unserved areas*
- *Ability to deploy faster significantly improves service experience*

# Providing Significant Value for our Customers

## Actual benefits experienced by Communication Service Providers, Network Equipment Providers and Enterprises in lab & production environments

**\$30M+**

Annual savings due to faster MTTR

**\$20M+**

Annual savings due to reduced SLA violations

**50%+**

Increase in Trouble Ticket Resolutions

**15%+**

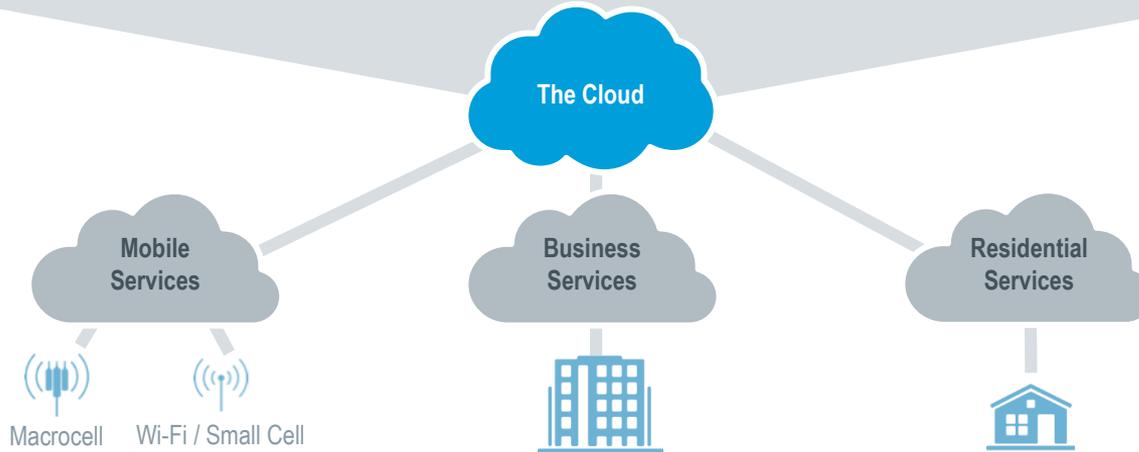

Increase in first call resolutions

**10x**

Faster releases, upgrades & turn-up

**80%+**

Increase in testing workflow efficiency

# Summary: Well Positioned for the Shift to Virtualization

## Accelerate & automate the entire service lifecycle

- Build on strong installed base with leading customers
- Create valuable synergy by integrating our broad set of network test elements
- Enable successful transformation to virtualized services with our holistic testing capabilities

The background of the slide is a photograph of the Shanghai skyline at night, viewed from across the water. The Oriental Pearl Tower is the most prominent feature, illuminated with bright pink and purple lights. Other skyscrapers are lit up with various colors like yellow, green, and blue. The water in the foreground reflects the city lights.

# The Problem for Carriers: Traffic Growth vs. Cost Savings

# The Solution: Move from Hardware to Software

*Eliminate (or minimize) dependence on custom built hardware*

When there is Innovation there is Change...

Where there is Change, there is a need to make sure it works

# High-Speed Ethernet Product Portfolio

## Industry-Leading Layer 2-7 Traffic Generation

Flexible Functionality
- MX**  
Multiprotocol Performance

## Developing Technology for Tomorrow

Seven Speed Test Module with Fiber Channel  
FX3 and MX3 (100/50/40/25/10GbE) with 16G & 32G FC

Twelve ports of DX3 100/50/40/25/10GbE

## To Meet Your Testing Needs

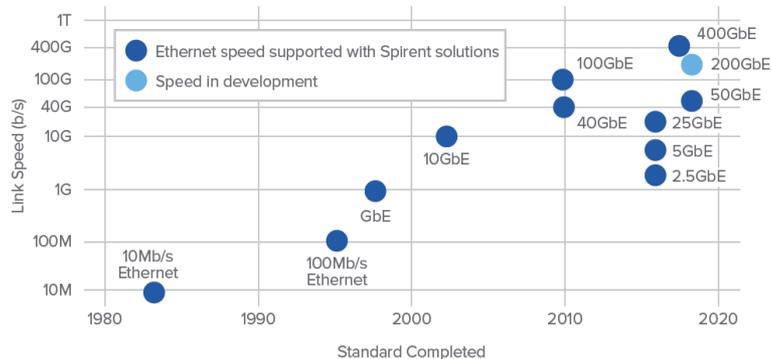

Industry's highest density test systems  
Including 400G since April 2016

Releasing 200G test modules in 2017

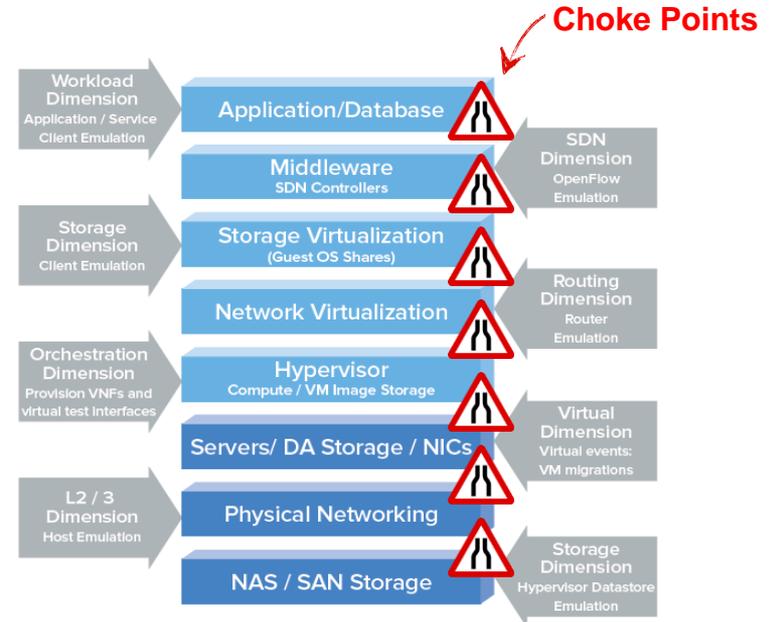

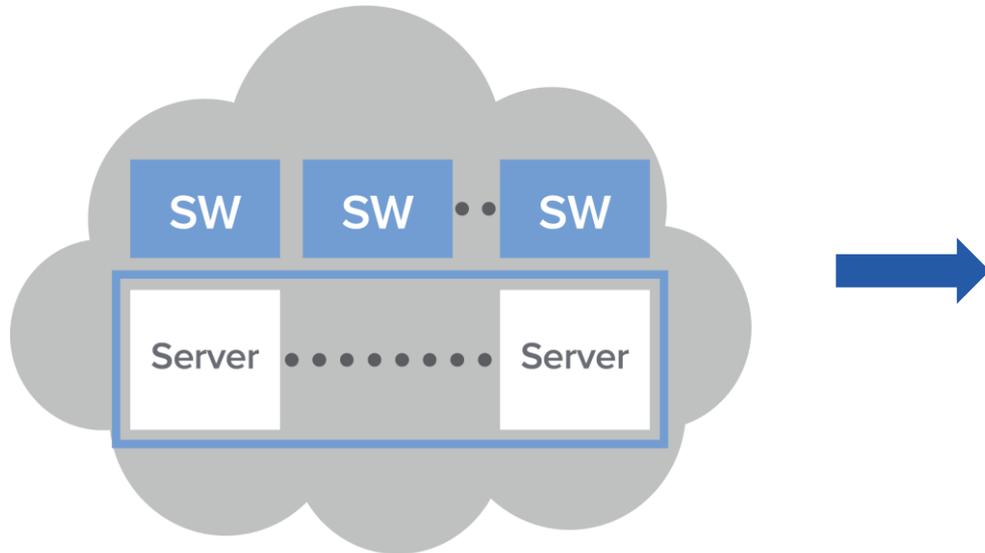

Evolution of Ethernet

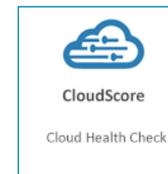

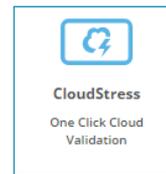

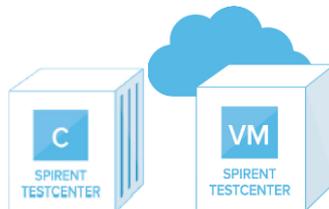

# Helping our Customers build the Networks of Tomorrow

Networks will be Hybrid as not all services can be Virtualized – 99.999% reliability is required

Yet, Virtualization poses a complex new challenge

# Virtual and Cloud Product Portfolio

## All new speeds – 25G and 40G

- Industry's first 25G and 40G Virtual testing solution!
- Unparalleled throughput for ESXI and OpenStack based clouds

## First to market advantage

Cloud Native Ready

# Customer Situation/Use Case for Network Test

## *Cisco positioning their products over bare-metal switches*

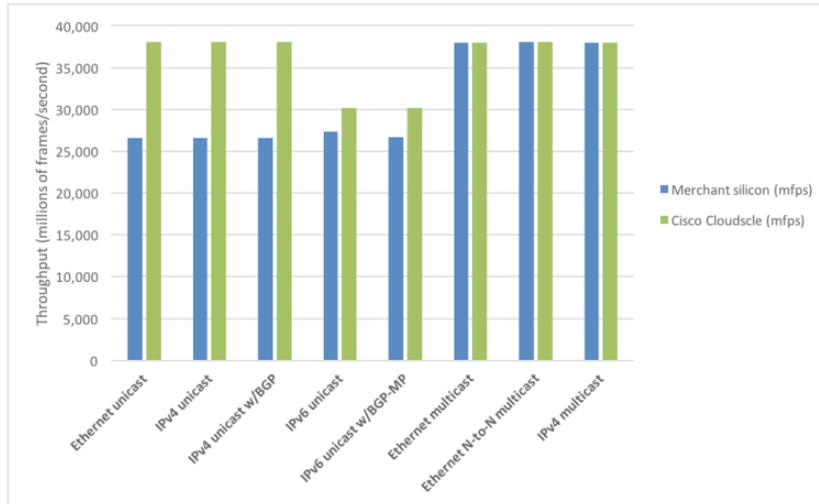

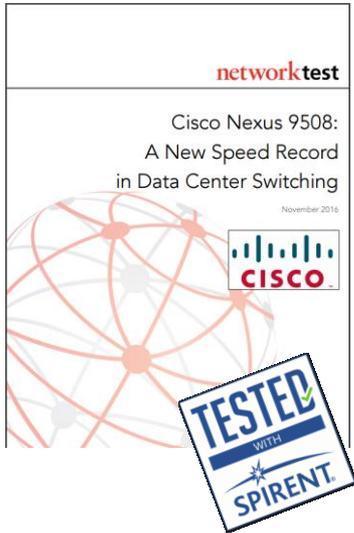

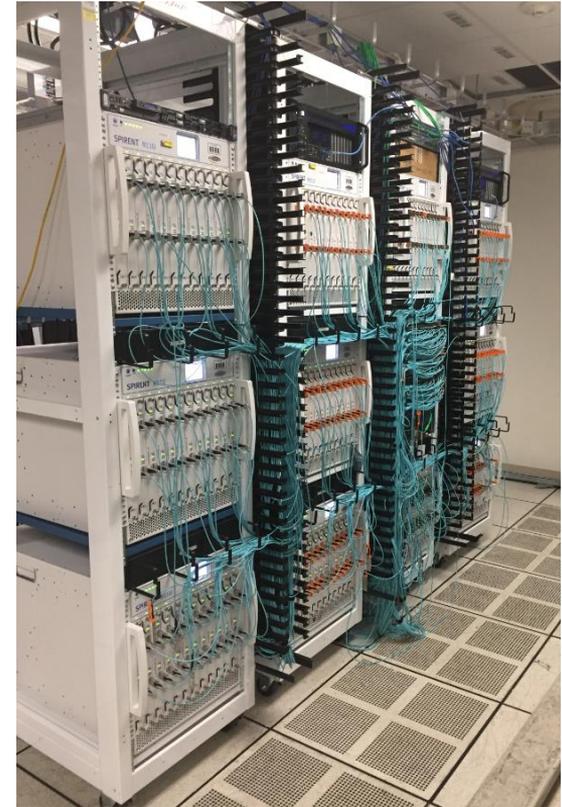

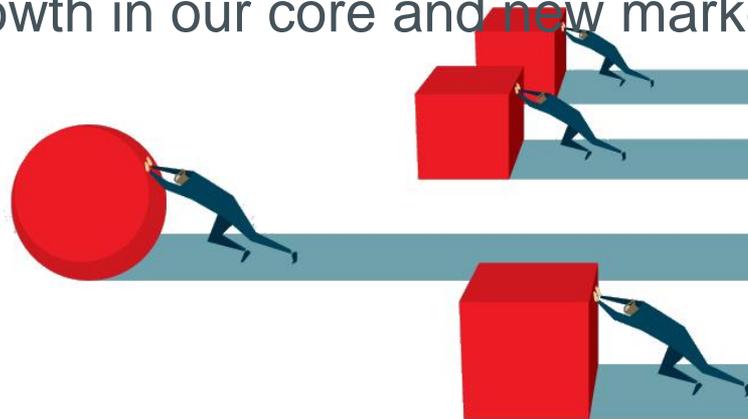

Figure 2: Comparing Cisco Cloudscale and merchant silicon throughput

# Summary

- Spirent innovating with new technology for testing tomorrow's networks
- Established leadership in High-Speed Ethernet testing platforms
- Extensive existing customer base continuing to invest
- Expanding our customer base with cloud solutions
- Excited with opportunities of growth in our core and new markets

A panoramic view of the Shanghai skyline at night, featuring the Oriental Pearl Tower, the Shanghai Tower, and the Shanghai World Financial Center, all illuminated against a dark blue sky. The buildings are reflected in the water of the Bund.

# Security for the Connected Future

John Weinschenk  
General Manager

# About Spirent Security

*Spirent reduces risk from hackers with Security solutions*

- Helps customers proactively understand their security risk
  - Validating security arsenal can defend global threats while maintaining performance and reliability
- Provide consolidated intelligence needed to balance performance with security
- Addresses unique needs for core markets
  - equipment manufacturers, service providers, government entities and enterprises in regulated markets

# Importance of Application Security

*The connected world communicates through applications*

- Security demand outpaces budget growth
- Ever changing threat landscape
- Deploying too many point solutions create information overload

**Consolidated Security and Performance Intelligence – The Next Frontier**

# Evolving Our Value to our Customers

*Security a natural progression*

Validate network systems effectiveness

Test application authentication and authorization

Device hardware testing for unauthorized access

Mobile application & infrastructure security validation

Address unique security vulnerabilities presented in virtual and cloud environments

## Security Solutions

Spirent Performance and Service Assurance Testing

**Wireless & Positioning  
Device Manufacturers**

**Network Equipment  
Manufacturers**

**Network Operators**

**Enterprises &  
Governments**

## Strengthen security for the connected future

- validate security arsenal and mitigate risk
- intelligence to stay ahead of global threats
- maintain performance and reliability

**cyberflood**

Security and Performance Testing  
for App-Aware Solutions

**securitylabs**

Extending Your Cyber Security Team  
to Identify and Mitigate Risk

# CyberFlood: Extending Our Core Expertise

- Advanced L4-7 Testing
  - Security Focused
  - Network Load/Performance
- Fast Growing Industry Verticals
  - Enterprise Security
  - IoT / Automotive
  - Virtual / Cloud
  - Critical Infrastructure
- Ease of use
  - Team testing
  - Intuitive user interface

The screenshot displays the CyberFlood web interface. The top navigation bar includes 'Dashboard', 'Test Builder', 'Profile Builder', and 'Library'. The main content area is divided into several sections:

- Performance:** A list of test categories including HTTP 1.1 Throughput, Max HTTP 1.1 Throughput, DNS Performance, Throughput with Mixed Apps & Protocols, Network Resiliency, Traffic Replay, Application Identification, and Reliability Testing.
- Capacity:** A list of test categories including Max HTTP Open Connections, HTTP 1.0 Connections Per Second, and Security.
- Security:** A list of test categories including Cyber Security Assessment, Volumetric DDoS Attacks, Protocol DDoS Attacks, Fuzzing, and Custom.
- Running Tests (0):** A section for active tests.
- Recent Tests (3):** A list of recent tests, including 'Neo - Max HTTP O'.
- TestCloud:** A section showing system metrics: CPU 9%, RAM 32%, HDD 85%, Application: 7238, Attacks: 2553, Malware: 1973, and Connection Status: OFF.
- Why run this test?:** Three sections explaining the purpose of different tests: 'Measure maximum throughput', 'Push the limits of concurrency', and 'Emulate user experience'.
- Description:** A section for a specific test template: 'Test created for Layer4-7 Max HTTP Open Connections Test Template'.
- Test Results:** A table showing the results of various tests, including 'Neo Demo HTTP 1.1 Throughput', 'Volumetric DDoS Attacks', and others.

## Managed Vulnerability Scanning & Penetration Testing

- **Network** and Wireless
- Web and Mobile **Applications**
- **Devices** (SmartHome, Network Devices, Banking, Automotive)

The screenshot displays the SecurityLabs dashboard for an assessment titled "Demo - Ready for Testing". The dashboard includes a navigation bar with "securitylabs" and "Dashboard" tabs, and a "SecLabs SSL" dropdown. The main content area shows the assessment details: Name: Demo - Ready for Testing, Address(es): http://demovulnerableapp.com, State: Completed, and Finished Date: 2017/01/06 02:05 PM. A summary section displays "Total Vulnerabilities (6)" with four circular gauges: 0 Critical (red), 2 High (orange), 2 Medium (yellow), and 2 Low (light yellow). Below this is a search bar and an "Export Findings" button. A table lists the findings, with columns for Finding ID, Name, Type, Severity, Risk Score, Location Found, When Found, and Actions.

| Finding ID | Name                      | Type          | Severity | Risk Score | Location Found               | When Found | Actions |
|------------|---------------------------|---------------|----------|------------|------------------------------|------------|---------|
| 1571       | Password Autocomplete     | Vulnerability | Low      | 0          | http://demovulnerableapp.com | 12/31/2016 | ⋮       |
| 1570       | Check HTTP Methods        | Vulnerability | Low      | 0          | http://demovulnerableapp.com | 12/31/2016 | ⋮       |
| 1569       | Password Autocomplete     | Vulnerability | High     | 0          | http://demovulnerableapp.com | 12/31/2016 | ⋮       |

| 1566       | DOM Based Cross-Site S... | Vulnerability | High     | 0          | http://demovulnerableapp.com | 12/31/2016 | ⋮       |

# Case Study: Large Regional US Hospital

- **Unmet business need:**
  - Security testing of NextGen operational surgical device used by hospital.
- **Spirent solution:**
  - Identification & impact of threats, and vulnerabilities, and map findings to HIPAA requirements.
- **Why we won:**
  - Real world understanding of complexities within hospital environment from mission critical components and secure network integrations with University partners.

A panoramic view of the Shanghai skyline at dusk. The Oriental Pearl Tower is illuminated in purple and pink, while the Shanghai Tower and other skyscrapers are lit up with various colors. The Bund is visible in the foreground, and the Huangpu River reflects the city lights.

## Summary & Conclusion

Eric Hutchinson  
Chief Executive Officer

## Sharp focus on target market opportunities that matter most to our customers

- We have developed new products and services to meet the key market disruptions
- Shifted investments to selected priorities:
  - High-speed Ethernet
  - Cyber Security
  - Virtualization
  - Automated active test and analytics for service assurance
  - 5G wireless

Positioned to serve the needs to develop the smarter future

## Final Q&A

# Lunch & Product Demonstrations

## Product Demonstrations

## (1) Markets & Markets (M&M)

Report: Industrial IoT Market by Device & Technology, Software, Vertical, and Geography - Global Forecast to 2022 - February 2017

M&M forecast that "the Industrial IoT (IIoT) market was valued at USD 113.71 Billion in 2015 and is estimated to reach **USD 195.47 Billion by 2022**, at a CAGR of 7.89% during the forecast period." "The market for camera systems is expected to grow at the highest rate during the forecast period."

## (2) Markets & Markets

Report: Smart Home Market by Product, Software & Service, and Geography - Global Forecast to 2022 – May 2016

M&M forecast that "the The global smart home market is expected to grow from USD 46.97 Billion in 2015 to **USD 121.73 Billion by 2022**, at a CAGR of 14.07% between 2016 and 2022." "Lighting control, security & access control, HVAC control, entertainment & other controls, home healthcare, and smart kitchen are the different hardware products used in the smart home market"

## (3) BI Intelligence

Report: The Enterprise Internet Of Things Report for the Top IoT Sectors – November 2014

BI Intelligence forecast that "spending on enterprise IoT products and services will reach **\$255 billion globally by 2019**, up from \$46.2 billion this year, according to our estimates. This represents a 5-year CAGR of 40%."

## (4) Gartner

Press Release: Gartner Says Smart Cities Will Use 1.1 Billion Connected Things in 2015 - March 2015

Gartner, Inc. estimates that "1.1 billion connected things will be used by smart cities in 2015 (see Table 1), rising to **9.7 billion by 2020**."

Smart homes and smart commercial buildings will represent 45 percent of total connected things in use in 2015, due to investment and service opportunity, and Gartner estimates that this will rise to 81 percent by 2020."

## (5) Frost & Sullivan (F&S)

Conference: Connectivity and the Emergence of Smart Cities at Growth, Innovation & Leadership Congress (GIL) - November 2014, Australia

F&S forecast that "the global smart city market will be valued at **US\$1.565 trillion in 2020**. Over 26 Global Cities are expected to be Smart Cities in 2025, with more than 50% of these smart cities from Europe and North America."

## (6) BI Intelligence

Report: The Connected-Car Report: The Transformation of the Automobile – April 2016

BI Intelligence forecast that "over **380 million connected cars** will be on the road by 2021"

## (7) BI Intelligence

Report: The Connected-Car Report: The Transformation of the Automobile – April 2016

BI Intelligence forecast that "Connected Car hardware and software will bring in **\$152 billion by 2020**"

## (8) Markets & Markets (M&M)

Report: Fleet Management Market by Deployment Type, Solution, Connectivity Technology, Industry, Service, and Region - Global Forecast to 2021 – September 2016

M&M forecast that "the fleet management market size is expected to grow from USD 9.54 Billion in 2016 to **USD 27.90 Billion by 2021**, at a Compound Annual Growth Rate (CAGR) of 23.9% during the forecast period. The major growth drivers of the market include the regular scheduled maintenance of fleet and the need to meet compliance requirements."

## (9) Markets & Markets (M&M)

Report: Unmanned Aerial Vehicle (UAV) Market, by Application, Class, SubSystem, Energy Source, Material Type, Payload and Region - Global Forecast to 2022 – November 2016

M&M forecast that "the UAV (Unmanned Aerial Vehicle) market is estimated to be USD 13.22 Billion in 2016 and is projected to reach **USD 28.27 Billion by 2022**, at a CAGR of 13.51% during the forecast period."

"Based on application, the civil & commercial application segment of the UAV market is projected to grow at the highest CAGR, as UAVs offer attractive platforms for a broad range of potential applications, such as aerial remote sensing, greenhouse emission monitoring, and precision agriculture, among others."
