1st Quarter 2021 **EARNINGS RELEASE**SMU S.A.

MAY 17, 2021

Executive Summary: SMU S.A.'s Consolidated Results

SMU reported **EBITDA**¹ for the first quarter of 2021 (1Q21) of CLP 52,390 million, a decrease of 2.8% with respect to CLP 53,914 million for the first quarter of 2020 (1Q20). However, 1Q21 EBITDA includes extraordinary expenses of CLP 2,074 million directly related to the COVID-19 pandemic. Excluding these expenses, EBITDA for 1Q21 would have totaled, CLP 54,464 million, **an increase of 1.0% with respect to 1Q20.**

EBITDA margin for 1Q21 amounted to 9.0%, an increase of 10 basis points (bps) with respect to the 8.9% reported for 1Q20. Excluding COVID expenses, 1Q21 EBITDA margin would have reached 9.4%, an increase of 50 bps.

Revenue for the first quarter of 2021 amounted to CLP 580,300 million, a decrease of 4.1% with respect to CLP 605,276 million for the first quarter of 2020, reflecting the high comparison base in 1Q20, as well as the impact of the pandemic, especially in the months of February and March 2021.

During the first quarter of 2020, the Company reported high levels of sales, reflecting both the high demand related to customers stocking up on groceries in the early days of the global pandemic and the extra day of sales on February 29, due to the leap year. In addition, quarantines and other restrictions on movement that were implemented in Chile in the months of February and March 2021 also affected 1Q21 revenue, especially at centrally located stores, reversing the recovery in traffic and number of transactions observed during the fourth quarter of 2020. However, it is important to note that the decrease in traffic was less pronounced in 1Q21 than it had been in the early months of the public health crisis, reflecting the adjustments and improvements the Company made to its value proposition and product assortment, in response to changes in customer shopping habits and needs.

With respect to **online sales**, SMU complements its own online sales platforms with partnerships with last milers for the Unimarc and OK Market formats. Sales through last milers grew over 150% in the first quarter of 2021 compared to the same period of 2020. Considering all online channels, including SMU's own online platforms and sales through last milers, revenue grew 85% in the first quarter of 2021.

Gross profit for the first quarter of 2021 totaled CLP 174,081 million, a decrease of 3.0% with respect to CLP 179,544 million for 1Q20. As a percentage of revenue, **gross margin expanded 30 bps**, totaling 30.0% in 1Q21, vs. 29.7% in 1Q20.

SMU's first quarter results show the **impact of operating efficiency initiatives** that the Company has been implementing as part of its strategic plan over the last several years, reflected in the **decrease of 3.1% in operating expenses**² compared to 1Q20. This significant reduction was achieved even including the extraordinary COVID-related expenses. Excluding those expenses, the reduction in operating expenses would have reached 4.8%. This discipline in expenses will allow the Company to improve its results going forward, when public health conditions enable customer traffic to return to normal levels, with the consequent positive impact on sales.

² Operating expenses = distribution costs + administrative expenses - depreciation - amortization

¹ EBITDA = Gross profit – distribution costs – administrative expenses + depreciation + amortization

Non-operating results for 1Q21 amounted to CLP -31,934 million, a difference of CLP 7,623 million with respect to CLP -24,311 million in 1Q20. This variation is primarily due to non-recurring effects in other gains and losses, and in particular a plan to optimize the Company's organizational structure that was implemented in February 2021 and began to generate savings in March.

Net income for the first quarter of 2021 totaled CLP 5,043 million, compared to CLP 6,901 million for the same period of 2020. Although this represents a decrease of 26.9% (CLP 1,858 million), this is primarily due to **one-time effects** in non-operating results.

With respect to the Company's financial situation, it is important to note that in March and April, **both of SMU's credit rating agencies upgraded the Company's credit rating**: ICR modified the rating from A- (positive outlook) to A (stable outlook), and Feller-Rate modified the rating from A- (stable outlook) to A (stable outlook).

Management Commentary

With respect to the release of earnings for the first quarter of 2021, SMU's CEO, Marcelo Gálvez, stated, "In the first few months of this year, we have seen the positive impact of our focus on operating efficiency and discipline in expenses as a central part of our strategy. As such, this quarter we achieved a reduction in our operating expenses for the period, even as we faced extraordinary expenses related to the pandemic."

Mr. Gálvez went on to say, "This efficiency in operating expenses enabled us to achieve an EBITDA margin of 9.0%, the highest first quarter EBITDA margin in our history, despite the fact that revenue was effected by the pandemic. The strategic initiatives that we have implemented—such as standardization and digitalization of processes—have allowed us to develop an efficient operating model that positions us to continue improving our results going forward, especially once public health conditions enable customer movement and traffic habits to return to normal levels."

"Although revenue was down this quarter, it is important to keep in mind the high comparison base from the first quarter of 2020, when we had an extra day of sales, due to the leap year, and high levels of demand related to customers stocking up on groceries at the beginning of the pandemic. However, it is worth highlighting the fact that even as a significant number of our stores were affected by quarantine restrictions in February and March this year, the decrease in traffic was less pronounced than it had been in the early months of the pandemic. This shows that our customers have responded favorably to the different adjustments we have made in order to satisfy their changing needs and preferences under these circumstances."

"The formats with more central locations, Unimarc and Mayorista 10, have faced more of an impact from the quarantines and other restrictions on movement, but Alvi's revenue grew by close to 5%, and in the case of OK Market, revenue growth exceeded 14%. The trend of strong growth in online sales also continued this quarter, with an increase of 85% in sales through our own platforms and partnerships with last milers."

"In the last couple of months, we have also had good news from our rating agencies: both ICR and Feller-Rate decided to upgrade our credit rating from A- to A, reflecting the resilience we have shown during the pandemic, as well as the sustained strengthening in our financial situation," concluded Mr. Gálvez.

Highlights

Credit Rating Upgrades

In March and April, both of SMU's credit rating agencies upgraded the Company's credit rating: ICR modified the rating from A- (positive outlook) to A (stable outlook), and Feller-Rate modified the rating from A- (stable outlook) to A (stable outlook).

1. Analysis of Income Statement

1.1. Results of Operations

1.1.1. Revenue

Revenue for the first quarter of 2021 amounted to CLP 580,300 million, a decrease of 4.1% with respect to CLP 605,276 million for the first quarter of 2020.

During the first quarter of 2020, the Company reported high levels of sales, reflecting both the high demand related to customers stocking up on groceries in the early days of the global pandemic and the extra day of sales on February 29, due to the leap year. Therefore, the decrease in revenue reported in the first quarter of 2021 is, in part, a consequence of the high comparison base for the previous year. Quarantines and other restrictions on movement that were implemented in Chile in the months of February and March 2021 also affected 1Q21 revenue, especially at centrally located stores, reversing the recovery in traffic and number of transactions observed during the fourth quarter of 2020. However, it is important to note that the decrease in traffic was less pronounced in 1Q21 than it had been in the early months of the public health crisis.

In addition, it should be noted that revenue for the first quarter of 2020 includes the recognition of the preliminary estimate of the indemnity for business interruption insurance, CLP 2,605 million, for stores that were closed due to the social crisis. Although this amount is treated as revenue, it is important to note that the insurance claim is calculated on the basis of fixed expenses and the margin of each store, and therefore this amount is not equivalent to the loss of revenue. Instead, it is a closer approximation of the loss of EBITDA, plus fixed expenses. In this sense, revenue for the first quarter of 2020 is not fully comparable to revenue for the same period in 2021.

The preliminary amount recognized for business interruption insurance is included in the revenue by format in table 2, below, but it is not included for purposes of same-store sales or sales per square meter.

Table 2: Revenue (CLP MMM)

REVENUE (CLP MMM)	1Q21	1Q20	△%
UNIMARC	395	415	-5.0%
CASH & CARRY	156	159	-1.6%

FOOD RETAIL CHILE	569	591	-3.7%
FOOD RETAIL PERU	11.2	14.1	-20.9%
CONSOLIDATED	580	605	-4.1%

^(*) Beginning in the third quarter of 2020, e-Commerce includes revenue from Telemercados and the Los Dominicos dark store. It does not include revenue associated with partnerships with last milers, which is reflected in the revenue of the respective formats (Unimarc and OK Market).

Food Retail Chile revenue decreased 3.7% in 1Q21 with respect to 1Q20. By format, revenue for Unimarc—the traditional supermarket—decreased 5.0% in 1Q21. As explained above, the decrease reflects the high comparison base, due to high levels of demand in 1Q20. Revenue for the cash & carry segment decreased 1.6% in 1Q21, reflecting the impact of quarantines on the Mayorista 10 format, in which over 60% of stores have central locations. For its part, the Alvi format reported revenue growth, despite having few stores in operation than in 1Q20. With respect to the OK Market convenience stores, revenue increased 14.5% in 1Q21. Revenue for the e-Commerce channel, which includes the Telemercados format, the Unimarc.cl website pilot program, and the Los Dominicos dark store, increased 30.1% in 1Q21, reflecting the fact that due to the pandemic, many clients need or prefer to receive their groceries at home, without having to go out.

With respect to this trend, it should be noted that SMU complements its own online sales platforms with partnerships with last milers for the Unimarc and OK Market formats. Sales through last milers grew over 150% in the first quarter of 2021 compared to the same period of 2020.

Considering all online channels, including SMU's own online platforms and sales through last milers, revenue grew 85% in the first quarter of 2021.

In Food Retail Peru, revenue (measured in Peruvian Soles) decreased 5.5% in 1Q21, due in part to restrictions affecting operating hours during the week and mandating that stores be closed completely on Sundays. These restrictions were imposed on supermarkets but not on other formats, such as traditional trade. Measured in Chilean pesos, revenue decreased 20.9% in 1Q21 compared to 1Q20, due to the impact of the exchange rate.

^{(**) &}quot;Others" includes all income other than that generated by the Company's operating formats presented in the table.

Table 3: Same-Store Sales Growth (%)

CONSOLIDATED	9.5%	-2.7%	-0.6%	9.1%	4.0%	-4.1%

Same-store sales (SSS) decreased 4.1% in 1Q21. By format, SSS for Unimarc decreased 5.2% in 1Q21. The cash & carry formats, for their part, saw a decrease of 1.5%, whereas OK Market convenience stores grew 13.7% in 1Q21.

Food Retail Peru—which accounted for 2% of SMU's revenue in 1Q21—recorded a decrease in SSS (measured in Soles) of 1.7% in 1Q21. Operations in Peru are undergoing a change in the composition of the customer base, with lower sales to mom-and-pops and growth in sales to end customers. This change has a positive impact on gross margin. However, as mentioned above, mandatory restrictions on operating hours had a negative impact on sales in the first quarter.

CONSOLIDATED	387.3	403.7	-4.1%

Sales per square meter reached CLP 387,317 for the first quarter of 2021, 4.1% lower than 1Q20.

Food Retail Chile sales per square meter decreased 3.7% in 1Q21 compared to 1Q20. For its part, Food Retail Peru (measured in Chilean pesos) recorded a decrease of 19.5% in 1Q21.

As of March 31, 2021, SMU's operations included **504 stores** in Chile, distributed from Arica to Punta Arenas—a decrease with respect to the 514 stores in operation at the end of 1Q20—and a total of **483,662** square meters.

The number of stores as of March 31, 2021 includes eight stores that were not operating due to fires or other damage caused by acts of vandalism during the social unrest in Chile beginning on October 18, 2019. By format, these eight stores include three Unimarc stores, one Mayorista 10 store, three Alvi stores, and one OK Market store. In addition, the total store number includes four OK Market stores that are located in universities or malls that are temporarily closed due to the COVID-19 pandemic.

During the first quarter of 2021, the Company opened three OK Market stores and one Unimarc store, as well as deciding to permanently close one Unimarc store.

In Peru, as of March 31, 2021, the Company had 24 stores, with 17,953 square meters, for a total selling space of 501,614 square meters at period end, including Chile and Peru. During the first quarter of 2021, the Company opened a new Maxiahorro store and closed two Mayorsa stores that were located in the same shopping center as a new Mayorsa store that was opened in December 2020 in order to replace these two stores.

1.1.2. Distribution Costs and Administrative Expenses

Distribution costs plus administrative expenses (excluding depreciation and amortization) totaled CLP 121,691 million for the first quarter of 2021, **a decrease of 3.1%** with respect to CLP 125,631 million for 1Q21. It should be noted that in 1Q21, the Company recorded extraordinary pandemic-related expenses of CLP 2,074 million. Excluding these exceptional expenses, the decrease in operating expenses would have amounted to 4.8% in 1Q21. As a percentage of revenue, operating expenses amounted to 21.0% in 1Q21 and 20.8% in 1Q20, an increase of 20 bps explained by lower operating leverage.

Distribution costs for 1Q21 totaled CLP 7,383 million, a decrease of 14.2% with respect to 1Q20. Distribution costs as a percentage of revenue amounted to 1.3% in 1Q21 and 1.4% in 1Q20, an improvement of 10 bps. The decrease in distribution costs is primarily due to the adjustment of the algorithm used to determine transportation cost, where the decrease in the cost of oil in 2020 had a positive impact on the rates applied in the first quarter of 2021.

Administrative expenses (excluding depreciation and amortization) totaled CLP 114,308 million (19.7% of revenue) in 1Q21, a decrease of 2.3% with respect to CLP 117,026 million (19.3% of revenue) in 1Q20. Excluding the CLP 2,074 million in expenses for 1Q21 that are directly related to the pandemic, the decrease in administrative expenses would have amounted to 4.1%.

The main variations in administrative expenses in the first quarter of 2021 were as follows:

- a. Decrease of CLP 3,389 million (-5.5% YoY) in personnel expenses, primarily due to lower average headcount in the period, and despite the higher minimum wage and inflation adjustments.
- b. Decrease of CLP 752 million (-21.0% YoY) in materials. It should be noted, in addition, that the pandemic-related expenses include CLP 625 million related to materials; excluding these extraordinary expenses, the savings would be even more significant.
- c. Decrease of CLP 426 million (-12.6% YoY) in advertising expenses.
- d. Increase of CLP 669 million (+24.0% YoY) in insurance expenses, reflecting the higher costs of coverage, resulting from the higher claims ratio following the social unrest in Chile that began in October of 2019. The increase in expenses began in February 2020, after the policy renewal, and therefore 1Q21 has an additional month of the higher expenses.
- e. Increase of 242 million (+6.9% YoY) in credit card commissions, as the use of electronic forms of payment has increased during the period.

FOOD RETAIL PERU	638	620	2.8%
CONSOLIDATED	27,483	29 , 957	-8.3%

1.1.3. Gross Margin, Contribution Margin, and EBITDA

Gross profit for the first quarter of 2021 totaled CLP 174,081 million (30.0% of revenue), a decrease of 3.0% compared to CLP 179,544 million (29.7% of revenue) in 1Q20. However, the gross margin for 1Q20 is not entirely comparable, as it is affected by the recognition of the preliminary estimate of the indemnity for business interruption insurance in revenue, with no offsetting cost associated with this amount. Excluding this effect, gross margin for 1Q20 would have been 29.4%, and as such, the 30.0% reported for 1Q21 represents an increase of 60 bps.

Contribution margin totaled CLP 166,695 million in 1Q21, a decrease of 2.5% compared to CLP 170,940 million for 1Q20. Measured as a percentage of revenue, contribution margin increased 50 bps, from 28.2% in 1Q20 to 28.7% in 1Q21.

EBITDA totaled CLP 52,390 million (EBITDA margin of 9,0%) in 1Q21, a decrease of 2.8% with respect to CLP 53,914 million (EBITDA margin 8.9%) in 1Q20. Excluding the extraordinary COVID-19 expenses, EBITDA for 1Q21 would have amounted to CLP 54,464 million (an increase of 1.0% with respect to 1Q20) and an EBITDA margin of 9.4%—50 bps higher than 1Q20.

EBITDAR (EBITDA less lease expenses) totaled CLP 59,052 million (EBITDAR margin 10.2%) in 1Q21, a decrease of 2.3% with respect to CLP 60,456 million (EBITDAR margin 10.0%) in 1Q20. Excluding the extraordinary COVID-19 expenses, EBITDAR for 1Q21 would have amounted to CLP 61,126 million (an increase of 1.1% with respect to 1Q20) and an EBITDAR margin of 10.5%.

1.2 Non-operating Income³ and Income Tax Expense

The consolidated **non-operating loss** for SMU totaled CLP -31,934 million in 1Q21, a difference of CLP 7,623 million with respect to CLP -24,311 million in 1Q20. The primary variations in non-operating results are the following:

- a. Other gains (losses): Other losses increased by CLP 6,166 million in 1Q21, primarily due to the plan implemented by the Company in February 2021 to optimize its organizational structure (loss of CLP 13,142 million), as a result of the operating efficiency initiatives that have been implemented as part of the strategic plan, including the incorporation of technological tools and redesigning in-store processes. This plan began generating savings in March 2021. With respect to 1Q20, other losses totaled CLP 7,303 million, primarily due to non-recurring effects related to acts of vandalism that took place in Chile beginning on October 18, 2019 (loss of CLP 4,999 million).
- b. Losses on inflation-indexed assets and liabilities increased by CLP 2,154 million in 1Q21 compared to 1Q20, due to higher average UF-denominated debt during the period, as well as higher inflation.

The **income tax benefit** for 1Q21 amounted to CLP 5,508 million, a difference of CLP 6,355 million with respect to the income tax expense of CLP -846 million for 1Q20, primarily due to the lower pretax results, as well as higher inflation in 1Q21, resulting in higher inflation adjustments to the tax loss carryforward.

1.3 Net Income

SMU reported **net income** of CLP 5,043 million for the first quarter of 2021, compared to CLP 6,901 million for the same period of 2020. Although this represents a decrease of 26.9%, this is primarily due to one-time effects in non-operating results.

³ Non-operating income = Financial income and financial expenses + Share in profit (loss) of associates + foreign currency translation differences + income (expense) from inflation adjusted units + other gains (losses)

2.1. Assets

As of March 31, 2021, SMU's **total assets** decreased by CLP 97,547 million (4.5%) with respect to December 31, 2020, totaling CLP 2,084,402 million.

Current assets as of March 31, 2021 decreased CLP 101,890 million (20.0%) with respect to December 31, 2020, totaling CLP 407,603 million. The primary variations during the period were:

- a. A decrease of CLP 101,456 million in cash and cash equivalents, primarily due to the amortization of the Series G and K bonds that matured in March. The remaining variations in cash and cash equivalents are described in section 3. Analysis of Statement of Cash Flows.
- A decrease of CLP 21,979 million in trade accounts receivable and other accounts receivable, primarily due to a decrease in accounts receivable from Transbank, related to the seasonality of the business.
- c. An increase of CLP 15.956 million in inventory, primarily due to the seasonality of the business.
- d. An increase of CLP 5,427 million in other current non-financial assets, primarily due to an increase in the VAT fiscal credit.

Non-current assets as of March 31, 2021 increased CLP 4,343 million (0.3%) with respect to December 31, 2020, totaling CLP 1,676,800 million. The primary variations during the period were:

- a. An increase of CLP 5,637 million in deferred tax assets, primarily due to inflation adjustments of tax loss carryforwards.
- b. A decrease of CLP 1,126 million in intangible assets other than goodwill, primarily due to amortization of CLP 2,326 million, partly offset by additions of CLP 1,223 million.

2.2. Liabilities

As of March 31, 2021, the Company's **total liabilities** decreased by CLP 91,426 million (6.3%) with respect to December 31, 2020, totaling CLP 1,366,003 million.

Current liabilities as of March 31, 2021 decreased by CLP 96,639 million (16.0%) with respect to December 2020, totaling CLP 507,556 million.

The primary decrease during the period was in other current financial liabilities (-CLP 87,305 million) primarily due to the decrease of CLP 85,923 million in obligations with the public, from the amortization of the Series G and K bonds, which matured in March (CLP 88,058 million), partially offset by accrued interest and the variation of the UF (inflation) during the period.

The other main variations during the period are detailed as follows:

- a. A decrease of CLP 6,504 million in other current non-financial liabilities, primarily due to a decrease in the VAT fiscal debit.
- b. A decrease of CLP 6,072 million in current provisions for employee benefits, primarily due to the payment of the annual performance bonus during the first quarter, as well as the use of vacation days during the summer.
- c. An increase of CLP 3,688 million in current trade and other accounts payable, due to an increase in withholdings.

Non-current liabilities as of March 31, 2021 increased by CLP 5,214 million (0.6%) with respect to December 2020, amounting to CLP 858,446 million. The main variation in the period was the increase of CLP 4,680 million in other non-current financial liabilities, primarily due to inflation adjustments to inflation-indexed bonds.

2.3. Shareholders' Equity

Shareholders' equity decreased by CLP 6,122 million (0.8%), primarily due to a increase of CLP 5,565 million in retained earnings, following the payment of the special dividend approved by shareholders at the extraordinary shareholders' meeting held on January 29, 2021 (CLP 10,608 million), partially offset by net income for the period of CLP 5,043 million.

With respect to **liquidity** indicators, the difference between December 2020 and March 2021 is mainly due to the fact that the decrease in current assets was greater than the decrease in current liabilities, as explained in section 2 of this document.

With respect to **indebtedness** indicators, the variation in the ratio of liabilities to shareholders' equity is due to the fact that the decrease in liabilities was greater than the decrease in shareholders' equity. The variations in net financial debt/EBITDA and net financial liabilities/EBITDA are explained by the increase in net financial det and the decrease in EBITDA for the last 12 months, for the reasons described in sections 1 and 2 of this document.

With respect to **working capital** indicators, the variations in receivable days and payable days are primarily due to decreases in average accounts receivable and accounts payable, respectively.

With respect to **efficiency** indicators, there are no significant changes between December 2020 and March 2021.

With respect to **profitability** indicators, the most significant change is in return on equity and is due to the decrease in net income for the last 12 months, which was greater than the decrease in equity.

5. Risk Management

The main risks faced by SMU, as well as certain measures taken by the Company to mitigate such risks, are described in note 4 to SMU's consolidated financial statements as of March 31, 2021.

6. Relevant Events During the Period

- 1. On January 11, 2021, the Company filed an essential fact, informing that that the Company's Board of Directors agreed to call an Extraordinary Shareholders' Meeting, following a request by Inversiones SAMS SpA, a shareholder that holds more than 10% of SMU's shares, that the Company call such meeting to evaluate the payment of a special dividend.
 - The proposal to be submitted for shareholder approval is as follows: To pay a special dividend, to be charged to retained earnings for previous periods, of CLP 10,608,000,000, equivalent to CLP 1.83765 per share. If approved, the dividend would be paid beginning on February 5, 2021 to shareholders of record as of the fifth business day prior to such date.
 - The Extraordinary Shareholders' Meeting will be held on January 29, 2021 at 10:00 am at the Company's offices at Cerro El Plomo 5680 11th floor, Las Condes, Santiago. In light of public health concerns related to the COVID-19 pandemic, the Board of Directors also agreed to offer shareholders to the option to participate remotely. Further information about how to participate remotely in the meeting will be available soon on the Company's website
- 2. As a consequence of the operating efficiency initiatives that SMU is implementing as part of its strategic plan, including the incorporation of new technologies and the redesign of in-store processes, the Company prepared a plan to optimize its organizational structure. This plan was approved by the Board of Directors on January 25, 2021 and carried out during the month of February 2021. The cost of this plan is approximately CLP 13 billion and will be recognized in the first quarter 2021 financial statements.
