

BVCI

Construction Solutions

Through our world-class strategies and procedures, **Black & Veatch Construction, Inc. (BVCI)** builds high-performing infrastructure projects with unsurpassed safety and quality.

BVCI was established in 1996 as a subsidiary of a leading engineering, procurement and construction firm. We are an employee-owned company that invests in our professionals through training, knowledge-sharing, and mentoring. This dedication to our team and the quality of our work enables us to make a world of difference in the communities we serve.

We tailor our construction services to the unique challenges of each market we work in. Our parent company's long-established experience as one of the most diversified engineering companies in the industry, combined with our project startup and commissioning expertise, uniquely qualifies us to successfully build projects of any complexity.

We offer a comprehensive suite of construction solutions and expertise.

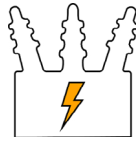

BVCI self-performs construction with a focus on safety, quality, cost, schedule and client satisfaction. We align closely with our clients and provide a unified approach to solving complex challenges from preconstruction through project closeout. Our construction strategies ensure competitive pricing, schedule accountability, and long-term returns on investments.

Conventional Generation

BVCI offers construction expertise for all types of utility-scale power generation assets. We solve our clients' most pressing reliability and resilience challenges.

- Alternative and renewable energy
- Natural gas
- Nuclear

Grid Modernization

From substations to transmission lines, we've done it all. Our nationwide reach allows us to efficiently provide services wherever our clients need us.

- Substations
- Overhead transmission lines
- Underground transmission lines
- High-Voltage Direct Current (HVDC) and Static Var Compensators (SVC)

Renewables

As early pioneers in creating utility-scale renewable energy, BVCI has the experience necessary to meet our clients' increasing demand for clean power.

- Solar photovoltaic (PV) and solar thermal
- Hydropower and dams
- Offshore and onshore wind
- Biomass and bioenergy

Integrated Water

Some of the world's most complex challenges surround managing and treating water. We build the most innovative and efficient ways to clean, move, control and conserve water.

- Wastewater and biosolids treatment
- Hydropower and dams
- Conveyance and storage
- Stormwater and flooding mitigation

Digitalization

BVCI leverages our relationships with carriers, utilities, communities and private entities to build communications networks and infrastructure.

- Fiber broadband networks
- IT networks
- Public wireless network security
- Utility connectivity
- Public emergency communications networks
- Community-owned broadband networks

Smart City

From energy-efficient buildings to automated transportation planning, we work with city leaders and industry trailblazers to build scalable, integrated solutions that connect communities.

- Smart buildings and city systems
- Electric vehicle (EV) infrastructure

We have established building trades union relationships.

We've developed strong relationships with building trades unions through labor management committees, industry engagement, and BVC's Labor Relations team. We leverage all of these partnerships to ensure project staffing and on-time delivery.

BVCI is committed to communicating and collaborating with the Building Trades unions (NABTU and UBC) to provide a strong, safe, and highly skilled workforce for our clients' projects and to benefit the future of our industry.

We're proud to be signatory with all building trades under several key national and project labor agreements that support the needs of the construction industry and provide career opportunities for union members:

- National Construction Agreement (NCA)
- National Maintenance Agreement (NMA)
- General Presidents' Project Maintenance Agreement (GPPMA)
- National Wind Turbine Agreement (NWTAA)
- NIA Heavy & Highway Construction Project Agreement
- Owner Based Project Labor Agreements
- Regional Council Project Labor Agreements
- Outside Line Construction Agreements

We're committed to safety.

BVCI's mission is to lead the industry in safety performance. We foster a culture of personal accountability at all levels of the company, ensuring the highest standards of workforce health and safety through the following programs:

- **Our Zero Injuries Today philosophy** is built on the belief that working injury-free, one day at a time, is an achievable expectation. We provide our professionals top-notch training to enhance and improve our safety culture.
- **Our Employee Involvement Process approach** encourages professionals to assume a greater level of responsibility and ownership for health and safety in the workplace. We provide ample opportunities for employees to engage in meaningful conversation to improve daily safety processes and promote active participation.
