1. Introduction

The continuous growth and success across our markets is based on trust, enabling customers to enjoy articles that are not just fashionable, but also of high quality.

We recognise our responsibility to protect consumer health, the environment and our supply chain, and we reinforce our commitment to excellence in product quality, safety and sustainability through trustful relationships with our business partners.

By engaging in a business relationship, you confirm your understanding and acceptance of - depending on your business relationship with Zalando - either our Zalando Platform Rules or our General Conditions of Purchase of Zalando SE, which mandate compliance with all requirements outlined in this manual.

The manual is part of the contract between Zalando and the Partner, regardless of whether or not the Partner has signed it separately. Zalando will provide the Quality Assurance Manual to the Partner upon request at any time.

Product Restricted Substances List & Zalando Chemical Policy

The industry is transparent about the fact that advanced chemistry is essential for making fashion and lifestyle items in our wardrobe more creative, colourful, comfortable, durable and affordable. However, it is also anticipated that hazardous chemicals will be selected responsibly to eliminate harm to consumers, environment and workers within the supply chain.

We believe that due to the scale of our fashion platform, we can make a significant contribution and impact by setting stringent standards and collaboratively work on achieving them with our Partners.

To control chemical compliance Zalando established a Product Restricted Substances List (PRSL) which specifies permitted limits of toxic and harmful substances. The PRSL was developed in line with legislative and regulatory requirements set by the EU Commission and by trading territories that Zalando operates within.

There is no way to prove that a product is compliant without it undergoing full testing.

All Zalando Brands and Partners are required to implement a robust chemical management system and due diligence testing to ensure compliance with Zalando Product Restricted Substances List (PRSL) and relevant international standards and legislation.
