Continue your ZSS performance now with exporto

Keep the ZSS performance you rely on. As ZEOS' recommended solution, exporto takes over your shipping without disruption and keeps you fully aligned with the Zalando platform rules.

- ✓ Fully aligned with Zalando platform rules and SLA's
- ✓ A local Zalando-certified carrier in every market to hit your CXM KPIs
- ✓ One integration for end-to-end customer delivery
- ✓ A single, dependable partner from setup to last mile

**exporto is ZEOS'
recommended solution
for independent
drop-shipping.**

One integration. Built to scale across Europe.

All services for your cross-border business
combined in one solution.

Integrated directly into your WMS or ERP,
exporto handles all processes for scalable
success through efficient cross-border
shipping to key European markets.

Ship to these markets just as easily as you do domestically

ex:porto

Centrally controlled cross-border shipping with exporto – for efficient growth and maximum transparency.

One point of contact

- ✓ End-to-end solution for all cross-border services
- ✓ Centralised control instead of multiple providers and interfaces
- ✓ exporto as the single point of contact for all processes

Reliably short shipping times

- ✓ Late cut-offs for maximum flexibility
- ✓ Automated processes and partnerships with leading last-mile carriers
- ✓ Fast, reliable delivery in Europe

Fast connection

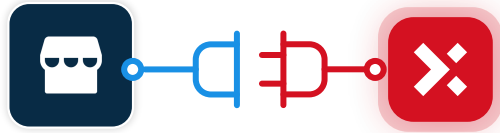

- ✓ Seamless API connection to ERP or WMS systems
- ✓ Direct transfer of product and shipping data
- ✓ Faster time to market through a central interface

Performance monitoring

- ✓ Central overview of all shipping data
- ✓ Transparent information that can be accessed at any time
- ✓ Ensuring compliance with the requirements of marketplaces, carriers and target markets

Your advantages with the exporto API

✓ **Monitoring & Stability**

We continuously monitor the interface - to ensure stable processes and a quick response to any deviations.

✓ **Control Over Data Flows**

You control which data is transmitted, tailored to your setup and process.

✓ **Stable Interface**

Changes are implemented in a way that ensures integrations remain stable and minimizes the effort required for adaptation.

✓ **Flexible Setup**

New markets, carriers, or processes can be added via the API without having to reconfigure the basic setup.

✓ **Increased Efficiency**

Automated data flows reduce manual effort and enable scalability in day-to-day operations.

Keep your Zalando performance and unlock your full potential

As ZEOS' recommended solution, ex:porto continues your shipping without disruption and helps you expand across new markets, without additional effort.

Let's talk.
