

Declaration of Conformity

The signatory, who represents the below-mentioned manufacturer,

Manufacturer:

Otto Bock Mobility Solutions GmbH
Lindenstraße 13
D-07426 Königsee

herewith declares that all distributed medical equipment which are in the scope of application of the below mentioned EC Directive are conform to their applicable provisions.

2011/65/EU Directive of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

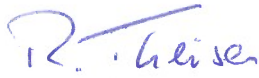

The conformity is declared according to Appendix VI of the Directive 2011/65/EU.

This declaration is valid for all products of the above design that are fabricated according to the respective fabrication documents.

RoHS-2 - EU-Directive 2011/65/EU

»Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment «

With the directive RoHS-2 the EU restricts the usage of certain problematic substances [lead, mercury, cadmium, chrome VI or flame retardants(PBB's and PBDEs)] in electric and electronic equipment. Medical devices were previously exempt. The revised version RoHS-2 (EU-Directive 2011/65/EU) is now extended to medical devices.

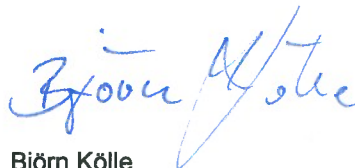

Starting July 22nd, 2014 all newly launched electric or electronic medical products must meet the RoHS-2 requirements. Otto Bock Mobility Solutions GmbH complies with this directive starting on the day of validity, e.g. for electronic wheelchairs and electric adaptations, The RoHS-2 conformity is shown in the CE-sign. In case of customer inquiries we provide a general RoHS-2 Declaration of Conformity.

Products that are already on the market enjoy consistent protection and, furthermore, can be used.

Yours faithfully,

Ralf Theisen
