

# Omo Neurexa Study Summaries

The summaries are organized in three levels depending on the detail of information. The overview table (Level 1) lists all the relevant publications dealing with a particular product (topic) as well as researched categories (e.g. biomechanics, X-Ray, functional tests, etc). By clicking on individual categories, a summary of all the literature dealing with that category will open (Level 2) if enough information is available.

For those interested to learn more about individual studies, a summary of the study can be obtained by clicking on the relevant reference (Level 3).
