GOING BEYOND CAT SEASON

From hail and tornadoes to floods and even named storms, catastrophes are increasing in frequency. They strike quickly – often with little notice – and can even happen “off-season.” Many times, they can devastate a dealership. The IAA Dealer CAT Service was recently created out of the clear need to be at the ready when, and even before, a storm hits.

HOW IT WORKS

IAA is onsite to assess the damaged inventory as soon as it is safe to be there. Working in conjunction with your dealer leadership and the insurance company, we take on all of the tasks and nuances a weather event can bring. These can seem overwhelming, but IAA has expertise in this area and can ensure that you are getting the situation handled and your business back up and running. We help assess venues, work directly with adjusters and even move inventory off your lot.

WHY IT WORKS

IAA has over 170 auction locations, so we are always in proximity to jump in to action when a CAT strikes. We can clear your lots and get you back in business. Our global buyer base and live and live-online auction model mean your vehicles will have a prime bidding model and the highest returns.
