

IAA has always taken great pride in our ability respond quickly in times of catastrophe and crisis, and our response to COVID-19 is no exception. We want to offer assistance to keep the claims process moving.

IAA Inspection Services can help you continue to process claims while helping maintain the safety of your employees.

Our Inspection Services team is ready to help manage assignments for insurance companies.
We are ready to help you!

WHAT IS IT?

IAA Inspection Services provides a digital solution for remote vehicle inspections and appraisals. Insurance companies receive high-resolution images and reports with all needed information, eliminating the need to deploy an appraiser to the field.

WHAT ARE THE BENEFITS?

In addition to maintaining business processes during this unprecedented climate, IAA Inspection Services delivers an improved experience for your policyholders and a significant reduction in both cycle time and advance charges.

HOW DOES IT WORK?

• ENHANCED IMAGES

We capture 40+ high-definition images, providing a clear look at the vehicle, and a multi-level quality assurance process to ensure image quality. See damage first-hand without deploying assets to the field.

• CONDITION REPORTING

Reporting provides pre-loss vehicle condition, option details and the information required to generate an accurate appraisal. We support all leading industry estimating platforms.

• APPRAISAL

Working with one of our strategic partners, an accurate appraisal is generated. Once an appraisal is complete, it is sent to you via your chosen estimating platform.
