SKILLS

- English
- Written communication
- Active listening
- HTML
- CSS
- JavaScript
- ReactJS
- Redux
- NextJS
- NestJS
- Quantitative Reasoning
- Git

ANDRÉS FERNANDO SAA

Full Stack Developer | ReactJS | Redux | NextJS | NestJS | PostgreSQL | Git

I'm a **Full Stack** developer focused on Frontend development, using **React** (ES6+ and Hooks) with **Redux**.

I also use **NextJS** (the react framework), **NestJS** (the NodeJS framework), and relational databases like **Postgres** deploying projects using **Netlify**, **Heroku**, and **Vercel**.

PROFESSIONAL EXPERIENCE

Full Stack Developer - Red Valley

March 2021 until now

I had contributed to **multiple projects** from different backgrounds like **legal documents management** (creation, management, sign, and sharing), **payroll automation**, and **e-commerce insights**.

Main goals and achievements: **15+ reusable components, 10+ pages, 10+ API endpoints.**

Technologies and tools: **NextJS** (the ReactJS framework), **Redux**, **TailwindCSS**, **Slack**, **Git**, and **GitHub**, **Vercel**, **NestJS** (NodeJS framework), **Storybook**, **Swagger**, **ClickUp**, **etc**

Software Developer - Be4tech

January 2020 to July 2020

Discovered and understood wearables behavior (connection, data transfer, services, characteristics, and others) using the **BLE** (Bluetooth Low Energy) standard and made a lot of research about this topic to go further. From this understanding I had achieved measuring and sending data (temperature, blood oxygen, heart rate, among others) to the backend for posterior analysis.

Main goals and achievements: **improved the team's productivity by teaching them how to use Git, starting using it right away, and keeping the source code safe.**

Technologies and tools: **Android Studio**, **Java / Kotlin**, **Ionic 4**, **Capacitor**, **consuming APIs with JWT(Json Web Token) authentication**.

Frontend Developer - OhmyFi

April 2019 to September 2019

Created and updated user experiences for the Wi-Fi point portals of clients such as **Starbucks**, **Medellín City Hall**, **Movistar Arena**, among others.

Technologies and tools: **HTML**, **CSS**, **JavaScript**, **Jquery**, **APIs consuming**, **HTML**, **Git/Gitlab**, **Scrum** and **Swagger**.

EDUCATION

Systems and Computing Engineer

Universidad Tecnológica de Pereira, Colombia

I owned the theoretical bases and practices of **software engineering**, **databases**, **electronics**, **computer architecture** and much more - January 2020

COURSES

Multiple courses at Platzi

Go and take a look at my **Platzi profile**, there you will find all the courses I have taken.
