A PERFECT SKIN, AN UNFORGETTABLE FACE

THE SKIN PREDICTION METHODOLOGY REINVENTS SKINCARE

At Hysope, we hold a deep belief in French excellence combined with the purity of natural ingredients to enhance the skin's beauty. Our nearly alchemical expertise, "Le Magnétis Vitae", allows us to optimize plant synergies by transforming them into "bioactive molecules," delivering truly unique treatments. Infused with Gold, Immortelle, Honey, Flower Nectar, and hundreds of locally sourced active ingredients, our formulas reveal their full potential. Each treatment features a profound massage across the face and décolleté, amplifying the effectiveness of our skincare products.

DIAGNOSIS

Discover your skin's biological age and the future of your face.

The diagnosis is a comprehensive assessment performed using an analyzer based on multi-spectral imaging and artificial intelligence. This system, the most reliable in skin image analysis, is widely used in medical research. It provides a complete mapping of your skin by measuring its texture, spots, wrinkles, sun damage, and other essential parameters invisible to the naked eye, revealing your skin's true nature. Additionally, it offers a projection of your face five years into the future. The time spent on the diagnosis is not included in the duration of the treatment.

40€ for 20 minutes, complimentary with any facial treatment or purchase of 2 or more products.
