

Cover Flashing

PRODUCT DESCRIPTION

A flashing profile in a zinc-aluminium alloy coating. This advanced, silver-coloured finish is used to cover the lip bar termination. EverGuard Cover Flashing provides an aesthetically appealing finish and provides a watertight seal typically against parapet walls. EverGuard Cover is a high quality, durable and cost effective way to give your roof an attractive finish and extra protection from water penetration. Come in 1220mm length per piece and predrill with screw hole every 400mm. Made from ZINCALUME® at 0.47mm Total Coating Thickness (TCT).
