Log Explorer & Insights

Fastly's Log Explorer & Insights allows you to quickly identify anomalies and troubleshoot them before they impact your services.

Instant visibility for faster action

✔ Proactive Monitoring and Issue Resolution
✔ Actionable Insights for Performance Optimization
✔ Simplified and Integrated Observability

Fastly Log Explorer & Insights empowers teams to proactively monitor, store, and analyze edge request data directly within the Fastly platform. With its intuitive dashboard, customers can quickly identify trends, troubleshoot anomalies, and optimize service performance without the need for complex external integrations.

Proactive Monitoring and Issue Resolution

- Detect and resolve issues before they impact users with proactive log monitoring and real-time analysis features.

Actionable Insights for Performance Optimization

- Leverage aggregated metrics and drill-down visualizations for actionable insights that drive continuous service performance improvements.

Simplified and Integrated Observability

- Eliminate reliance on third-party log analysis tools by integrating log monitoring and visualization directly with Fastly's platform to improve operational efficiency.
