Key-Value Stores

You don't have to think about where your data is going, it's already there. Build new kinds of apps, and imagine new experiences for your users with a data store that does what others can't.

Your data, everywhere you need it. Instantly

✓ Unmatched Speed for Key-Value Data Access
✓ Securely Manage Application Secrets at the Edge
✓ Dynamic Configuration Management for Your Apps and Services

Fastly KV Store simplifies edge data management by delivering a high-speed, globally distributed storage platform. With support for secure key-value storage and scalable configuration management at the edge, developers can build apps that are faster, more secure, and more resilient.

Unmatched Speed for Key-Value Data Access

- Unlock faster, more reliable applications with unparalleled speed and scalability

Securely Manage Application Secrets at the Edge

- Store and secure sensitive data with the speed and low latency you need for your applications at scale.

Dynamic Configuration Management for Your Apps and Services

- Manage configuration data in a flash with Config Store, enabling real-time updates for dynamic, optimized performance.
