

# Respiratory Technologies

## Non-confidential

### **Background:**

Our preference is to find opportunities that are on-market, market-ready, or require limited development. Opportunities may consist of new product forms, packaging innovations, delivery technologies, or new products.

### **Description of the need:**

We are interested in opportunities (i.e. products and technologies) that complement our Respiratory portfolio (DayQuil, NyQuil, Sinex and ZzzQuil) and are capable of delivering any or all of the following benefits:

- Providing new, or augmenting already established health claims
- Increasing consumer satisfaction
- Enhancing consumer compliance
- Enabling greater convenience
  
- Areas of INTEREST are:
  - Technology Delivery methods (e.g. targeted, faster, delayed, etc.)
  - Products with claimable health benefits
  - New and novel product forms
  - New packaging (e.g., portable, convenient, etc.)
  
- Opportunities MUST have (where applicable):
  - Human clinical data
  - Human safety data, NDI designation, or GRAS status
  - Stability data
  - Freedom to market

### **What we are not interested in:**

- Opportunities that require extensive technical or clinical development
- Opportunities with unknown regulatory path
- Opportunities that require significant investment to complete their development
